PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented a **durable service and API** for canonical risk decisions, integrating automated systems and human reviewers.
- Developed infrastructure to synthesize policy, business identity, and assessment signals into **explainable, confidence-calibrated decisions**.
- Improved the **transaction-laundering agent** by enhancing its policy grounding, evidence quality, and use of behavioural and dispute signals.
- Engineered **Python automation scripts** to streamline data validation and ETL processes, reducing manual effort by approximately **40%**.
- Managed production support for enterprise Java applications, responding to **P1/P2 incidents** and maintaining SLA targets across monitored systems.
- Contributed to the development of **Java Spring Boot REST APIs** for cross-service data exchange, including request validation and error handling.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configuration through **Jenkins** pipelines.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy, Flask, FastAPI

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Domain Expertise – Risk Decisioning, Transaction Monitoring, Financial Systems Support, ERP Integration, Change Management

PROJECTS

Risk Decisioning Service for Financial Transactions

- Built a **durable decisioning service** and API to process and store risk evaluations for financial transactions, integrating with multiple data sources.
- Developed **Python scripts** for data ingestion and transformation, preparing transaction history and user identity signals for the decisioning engine.
- Implemented **transaction monitoring** capabilities, enabling real-time analysis of payment flows and flagging suspicious activities for further review.

Automated Transaction Analysis Pipeline

- Engineered an **ETL pipeline using Python and SQL** to extract and aggregate transaction data from PostgreSQL and Oracle databases.
- Developed **data validation checks** and anomaly detection routines within the pipeline, reducing downstream data quality issues by an estimated **20%**.
- Created reports and alerts on key operational metrics, supporting the monitoring of transaction processing workflows for a financial services client.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
