PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **network vulnerability remediation solutions**, progressing from assessment and prioritization through change delivery and technical validation for enterprise routing and switching infrastructure.
- Assumed primary responsibility for the design, testing, and implementation of **vulnerability-led firmware upgrades** on routers and firewalls, ensuring adherence to security benchmarks and vendor advisories.
- Shared responsibility for **remediation of Windows and Linux server vulnerabilities**, providing cover for colleagues and supporting cross-platform remediation efforts during incident response.
- Developed and implemented **change validation and recovery controls**, including configuration backups and rollback strategies, before executing network device upgrades and patching.
- Assessed critical and actively exploited vulnerabilities, designing and implementing expedited remediation plans or **compensating controls** to materially reduce exposure during standard patching timescales.
- Hardened infrastructure technologies in line with approved **CIS and vendor security benchmarks**, ensuring robust security posture across the network estate.
- Containerized and deployed backend services for an internal feature store using **Docker and Kubernetes (EKS)**, configuring Helm charts and resource limits for predictable rollouts.

SKILLS

Networking – Enterprise routing, Switching, Firewalls, DNS/DHCP/IPAM, Network security technologies

Infrastructure Security – Vulnerability management, Vulnerability remediation, Security enhancement, Patching solutions, Remediation plans, Hardening, CIS benchmarks

Operating Systems – Windows Server, Linux

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Scripting & Automation – Python, Shell scripting

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum, Change management, Incident response

PROJECTS

Network Device Vulnerability Remediation Framework

- Designed and implemented an automated framework for identifying and remediating vulnerabilities on network devices, integrating with vendor advisories and security benchmarks.
- Developed Python scripts to parse vulnerability scan reports and generate prioritized remediation plans, reducing manual analysis time by **40%**.
- Shipped repeatable runbooks and technical validation procedures that are now used for routine network security upgrades, improving consistency and auditability.

Automated Patching Solution for Linux Servers

- Engineered an automated patching solution for a fleet of 500+ Linux servers using Ansible and a Jenkins CI/CD pipeline, ensuring timely application of security updates.
- Implemented pre- and post-patch validation checks, including service health monitoring and configuration integrity checks, reducing post-deployment incidents by **approximately 25%**.
- Developed comprehensive documentation and knowledge articles for the patching process, supporting the wider infrastructure operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
