HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed **Java Spring Boot** microservices for structuring and valuing voice deals in Interest Rate products, focusing on asynchronous processing and multi-threading.
- Implemented **Hibernate** and **JPA** for data persistence and retrieval against a PostgreSQL database, ensuring data integrity for trade matching workflows.
- Designed and implemented **JUnit** and **Mockito** test suites for core Java components, achieving over 85% code coverage for critical business logic.
- Participated in daily **Scrum ceremonies** and sprint planning sessions, providing technical estimations and contributing to the team's delivery roadmap.
- Collaborated with **Business Analysts** and **Product Owners** to understand and refine functional requirements for pre-execution sales trader workflows.
- Containerized Java applications using **Docker** and deployed them to an **OpenShift** environment, managing configurations and ensuring consistent builds across development and staging.
- Monitored JVM performance using **JConsole** and **VisualVM**, identifying and resolving bottlenecks in multi-threaded applications to improve response times by approximately 15%.

SKILLS

Languages – Java, SQL, JavaScript, TypeScript, Python, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, ReactJS, scikit-learn, pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle

Cloud/Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, OpenShift

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, TDD

Observability/Monitoring – Splunk, Dynatrace, CloudWatch, JConsole, VisualVM

PROJECTS

Interest Rate Deal Structuring Engine (Java)

- Engineered a **Java Spring Boot** application to process and value voice-traded Interest Rate deals, integrating with upstream market data feeds.
- Developed a **Hibernate**-backed persistence layer to store deal structures and match parameters, supporting complex queries for deal reconciliation.
- Implemented asynchronous messaging patterns using **JMS** to decouple deal processing stages, enhancing system resilience and throughput by an estimated 20%.

Trade Reconciliation Dashboard (HCL)

- Built a **Java REST API** service to extract and aggregate transaction data from multiple financial systems for reconciliation purposes.
- Designed and populated a PostgreSQL database schema to efficiently store and query reconciliation data, supporting ad-hoc reporting for operations teams.
- Developed automated Python scripts to perform initial data validation and load data into the PostgreSQL database, reducing manual data preparation time by 40%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
