PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **cloud-based data pipelines** using **Azure Databricks** and **Microsoft Fabric**, integrating data from various sources into a Lakehouse architecture.
- Enhanced and optimized **SQL Server** stored procedures and views to improve query performance, reducing report execution times by an average of **22%** for critical financial reports.
- Developed **Python** scripts for automating data quality checks and monitoring ETL processes, successfully identifying and rectifying an average of **15 data anomalies per week**.
- Contributed to the modernization of the Enterprise Data Warehouse by migrating on-premise **SQL Server** data to a cloud-native **Lakehouse architecture** on Azure.
- Participated in production support activities, investigating and resolving **data platform incidents** and performance issues, maintaining operational stability for business-critical systems.
- Implemented **Medallion (Bronze, Silver, Gold) data models** and best practices to structure and govern data within the cloud-based Lakehouse, ensuring data integrity and accessibility.
- Containerized data processing jobs using **Docker** and orchestrated their deployment and execution within an **Azure Kubernetes Service (AKS)** environment.

SKILLS

Cloud Platforms – Azure Databricks, Microsoft Fabric, Azure Kubernetes Service (AKS), AWS (EC2, S3, Lambda, CloudWatch)

Data Warehousing & ETL – Lakehouse Architecture, Medallion Data Models, SQL Server, T-SQL, ETL/ELT, Data Modelling, Power Query

Programming Languages – Python, SQL, Java, R

Scripting & Automation – JIL Scripting, AutoSys, Shell Scripting, Jenkins

Databases – SQL Server, PostgreSQL, MySQL, Oracle

Tools & Methodologies – Docker, Git, Jira, Confluence, Agile/Scrum, CI/CD

Analytics & BI – Power BI, Tableau, DAX, Pandas, NumPy, Scikit-learn

PROJECTS

Cloud Data Warehouse Modernization (HCL Technologies)

- Migrated a legacy **SQL Server**-based data warehouse to an **Azure Databricks** Lakehouse environment, improving data processing efficiency by **30%**.
- Developed automated **Python** scripts for data ingestion and transformation, reducing manual effort in the ETL process by approximately **10 hours per sprint**.
- Implemented **Medallion architecture** principles to structure raw, cleansed, and aggregated data layers, enhancing data governance and query performance.

Automated Financial Reporting Pipeline (HCL Technologies)

- Engineered a data pipeline using **Python** and **SQL** to extract, transform, and load financial transaction data for automated daily reporting.
- Designed and built interactive **Power BI** dashboards to visualize key financial metrics, enabling business stakeholders to track performance against targets.
- Integrated the reporting pipeline with **Jenkins** for automated scheduling and deployment, ensuring timely delivery of reports to operational teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
