HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for a pre-execution sales trader workflow system, focusing on structuring and valuing voice deals for interest rate products.
- Implemented robust asynchronous processing and advanced concurrency patterns in **Java** to manage high-volume transaction flows and ensure system reliability.
- Integrated **Hibernate** with **PostgreSQL** to build a persistent data layer for the trading system, ensuring data integrity and efficient data retrieval for complex financial instruments.
- Participated in daily **Scrum** ceremonies, including sprint planning and retrospectives, contributing to technical estimations and delivery timelines for the global development team.
- Collaborated with Business Analysts and Product Owners to translate functional and non-functional requirements into actionable development tasks for the sales & trading platform.
- Conducted code reviews for junior engineers, providing constructive feedback on code quality, adherence to design patterns, and maintainability of **Java** codebases.
- Containerized Java applications using **Docker** and deployed them to a Kubernetes cluster, ensuring consistent environments across development, testing, and production.

SKILLS

Languages – Java, Python, SQL, JavaScript, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, ReactJS, JUnit, Mockito

Databases – PostgreSQL, Oracle, MySQL

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, OpenShift

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

Methodologies – Agile, Scrum, TDD

PROJECTS

Interest Rate Product Trading System Enhancement

- Developed new **Java Spring Boot** modules to support the structuring and valuation of voice deals for interest rate products within a pre-execution sales trader workflow.
- Engineered asynchronous data ingestion pipelines using **Java** concurrency APIs to process real-time market data, reducing latency in deal valuation by approximately 15%.
- Implemented comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over 85% code coverage for critical trading logic components.

Financial Transaction Data Aggregation Service

- Built a **Java** service to aggregate and normalize financial transaction data from multiple sources, mapping disparate data formats to a unified schema.
- Integrated the service with **PostgreSQL** for storing aggregated transaction details, enabling faster querying for reporting and reconciliation workflows.
- Automated data validation checks using **Python** scripts to ensure data accuracy before ingestion into the main processing pipeline, catching ~20% of data anomalies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
