HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed enterprise data solutions using **Azure Databricks** and **Microsoft Fabric**, focusing on migration from on-premise SQL DWH to a cloud-native Lakehouse.
- Built and optimized cloud-based ETL/ELT pipelines and data integration processes using **Python**, processing approximately **1.5 TB** of data daily for reporting.
- Developed and maintained **SQL Server** databases, stored procedures, and views, tuning performance for critical regulatory and financial reporting, reducing query execution times by an average of **18%**.
- Implemented **Python**-based solutions for data engineering, automation of data quality checks, and workflow orchestration, reducing manual intervention by **45%**.
- Participated in production support and on-call activities for business-critical data platforms, investigating and resolving incidents within defined SLAs to maintain operational stability.
- Collaborated with business stakeholders and analysts to gather requirements, translate them into technical specifications, and deliver scalable data solutions for risk and finance reporting functions.
- Containerized data pipeline components using **Docker** and deployed them to a cloud environment, ensuring consistent execution and simplified management.

SKILLS

Cloud Platforms – Azure Databricks, Microsoft Fabric, AWS (EC2, S3, Lambda, CloudWatch)

Databases – SQL Server, T-SQL, PostgreSQL, MySQL, Oracle

Programming Languages – Python, Java, SQL, R

Data Engineering – ETL, ELT, Data Warehousing, Lakehouse Architecture, Data Modelling, Power Query, dbt

Development Tools – Docker, Git, Jenkins, Jira, Confluence, AutoSys, JIL Scripting

Analytics & BI – Power BI, Tableau, DAX, Pandas, NumPy, Scikit-learn

Methodologies – Agile, Scrum

PROJECTS

Enterprise Data Lakehouse Modernization (HCL Technologies)

- Architected and implemented a cloud-based Lakehouse architecture using **Azure Databricks** and **Microsoft Fabric** to replace a legacy on-premise SQL Server Data Warehouse.
- Developed robust **Python** scripts for data ingestion, transformation (ETL/ELT), and quality assurance, handling diverse datasets from various enterprise systems.
- Designed and implemented Medallion (Bronze, Silver, Gold) data models to ensure data quality, consistency, and efficient querying for downstream analytics and reporting.

Automated Financial Reporting Pipeline (HCL Technologies)

- Created automated data pipelines using **Python** and **SQL** to extract, transform, and load financial transaction data from multiple sources into a central repository.
- Developed **Power BI** dashboards to visualize key financial metrics and operational performance indicators, providing actionable insights to business stakeholders and reducing manual report generation time by approximately **30%**.
- Integrated data pipelines with existing enterprise systems via REST APIs, ensuring seamless data flow and timely delivery of reports for regulatory compliance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
