PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed enterprise-wide system management tools, focusing on improving **monitoring and alerting** capabilities across a distributed infrastructure.
- Migrated manually managed infrastructure and services towards an **automated, version-controlled model**, reducing manual intervention by approximately **40%**.
- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git**, enabling faster and more reliable software deployments.
- Managed and supported **Linux systems administration** in a medium to large enterprise environment, ensuring system stability and performance.
- Administered and supported **Nagios** and similar enterprise monitoring platforms, configuring checks and responding to alerts for critical systems.
- Scripted automation tasks and ETL processes using **Python**, enhancing operational efficiency and data processing for reporting.
- Containerised applications using **Docker** and deployed them to a **Kubernetes** cluster, managing configurations with **Helm**.

SKILLS

Monitoring Tools – Nagios, Prometheus, Grafana, Splunk, CloudWatch, Dynatrace

CI/CD & Version Control – Jenkins, Git, Helm

Automation & Configuration Management – Ansible, Python, Shell Scripting

Containerization & Orchestration – Docker, Kubernetes

Operating Systems – Linux, Windows Server

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases & Scripting – SQL, PostgreSQL, MySQL, Oracle, Python

PROJECTS

Enterprise Monitoring System Enhancement

- Enhanced an existing **Nagios** monitoring system by integrating **Prometheus** and **Grafana** for more granular performance metrics and improved dashboard visualization.
- Developed **Python** scripts to automate the configuration of monitoring checks across new server deployments, reducing setup time by **30%**.
- Implemented alerting rules within **Grafana** to notify operations teams of critical system events, decreasing incident response time for P1 issues.

Infrastructure Automation with Ansible and Docker

- Automated the deployment and configuration of application services on **Linux** servers using **Ansible** playbooks, ensuring consistent environments and reducing manual configuration errors.
- Containerized several enterprise applications using **Docker**, packaging them for deployment onto a shared **Kubernetes** cluster managed via **Helm** charts.
- Managed code repositories and deployment workflows using **Git**, establishing branching strategies and code review processes for the automation codebase.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
