PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts to automate data extraction and transformation tasks, reducing manual effort by approximately **40%** for the finance operations team.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, handling approximately **2,100 requests per minute** during peak load.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, resolving over **50 critical incidents** within defined SLAs across multiple client systems.
- Collaborated closely with Quantitative Researchers to optimize **Python** algorithms and data processing pipelines, directly contributing to the acceleration of research project delivery.
- Engineered data analysis and modelling features using **Python** with libraries such as **Pandas** and **NumPy**, supporting quantitative research initiatives.
- Participated in code reviews and sprint planning sessions, providing technical estimations and ensuring adherence to agile methodologies for new feature development.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation for improved application portability.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, Pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Linux

Analytics/BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Quantitative Feature Engineering Pipeline

- Developed a **Python** data pipeline to extract and transform complex financial transaction data, generating over **15 distinct features** for use in quantitative models.
- Integrated the pipeline with **PostgreSQL** for data storage and retrieval, ensuring efficient access for downstream model training and analysis.
- Wrote unit tests for pipeline components using **pytest**, achieving over **85% code coverage** to ensure data integrity and reliability for research use.

Algorithmic Trading Data Orchestration

- Built a **Python**-based orchestration service to manage the flow of market data for algorithmic trading strategies, processing approximately **1.5 million data points** daily.
- Implemented error handling and retry mechanisms for data ingestion from external APIs, improving system resilience and reducing data loss by an estimated **20%**.
- Deployed the service on **AWS Lambda**, integrating with **S3** for historical data archiving and enabling scalable data processing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
