HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented high-performance streaming systems for sports data ingestion, processing approximately **4,000 events per second** during peak market hours, utilizing Kafka.
- Developed and maintained robust server-side logic in **Java Spring Boot** for core trading platform components, focusing on REST API development and inter-service communication.
- Engineered **Python scripts** for data ETL and automation, streamlining the integration of reference file and streaming data feeds from multiple vendors, reducing manual processing time by **30%**.
- Participated in the full software development lifecycle, including designing and architecting complex systems, building, testing, and deploying solutions to production environments on **Kubernetes**.
- Integrated and managed data recording and price evaluation tools, ensuring data integrity and timely availability for quantitative researchers and business stakeholders.
- Collaborated closely with Quantitative Researchers and fellow developers in an **Agile** environment, contributing to sprint planning, technical estimations, and code reviews.
- Deployed and monitored containerized applications using **Docker** on **AWS EC2 instances**, ensuring reliable operation within the cloud infrastructure.

SKILLS

Languages – C#, Python, Java, SQL.

Frameworks/Libraries – Spring Boot, Kafka, Pandas, NumPy, scikit-learn, NestJS.

Cloud/DevOps – Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle.

Methodologies – Agile, Scrum, Event-Driven Architecture.

Tools – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau.

PROJECTS

Sports Data Streaming Platform (HCL Technologies)

- Developed a real-time data ingestion pipeline using **Python** and **Kafka** to process and stream live sports data feeds from multiple external vendors.
- Implemented data recording and initial price evaluation tools, enabling quantitative researchers to analyze market data with **p95 latency below 200ms**.
- Designed system architecture for high-throughput data processing, handling bursts of up to **3,500 messages per second** during major sporting events.

Automated Trading System Enhancements (HCL Technologies)

- Enhanced an existing order sending system with **Java Spring Boot** to improve scalability and reliability for trading across multiple sports leagues.
- Built REST APIs for integrating reference data files, ensuring consistent and accurate information for trading algorithms.
- Containerized key services with **Docker** and deployed them to a **Kubernetes** cluster, improving deployment speed and operational stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
