HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered Python scripts to automate ETL processes for the financial-services operations dashboard, reducing manual data ingestion time by approximately **40%**.
- Developed and maintained Java Spring Boot REST APIs for cross-system data exchange, supporting internal enterprise applications.
- Managed production incidents for enterprise Java/.NET applications, resolving P1/P2 issues within strict SLA parameters using **Splunk** and **Dynatrace**.
- Analyzed and optimized complex low-latency trading topologies and scenarios within a dedicated lab environment, identifying performance bottlenecks.
- Collaborated with Traders, Quantitative Researchers, and System Engineers to analyze production trading and lab network data, formulating testing scenarios.
- Implemented testing automation efforts using Python and PowerShell scripting to streamline the validation of trading system enhancements.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent environments for development and production.

SKILLS

Languages – Python, Java, C/C++, C#, PowerShell

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Networking – BGP, IGMP, PIM, Ethernet, IP, UDP, TCP, LLDP

Trading Systems – Low Latency Trading, Performance Analysis, Lab Environment Setup, Production Data Analysis

Tools & Frameworks – Jupyter Notebooks, Spring Boot, Splunk, Dynatrace, Jira, Confluence

PROJECTS

Low-Latency Trading System Optimization Lab

- Recreated complex low-latency trading topologies in a dedicated lab environment to analyze performance characteristics under various market conditions.
- Developed Python scripts for automating data collection and analysis from lab experiments and production trading feeds, enabling hypothesis testing.
- Identified and recommended specific optimizations for network protocols and system configurations based on detailed analysis, contributing to improved trading speeds.

Automated Trading Data Analysis Pipeline

- Engineered a Python-based data pipeline to process and analyze large volumes of production trading and lab network data from disparate sources.
- Integrated Jupyter Notebooks for interactive data exploration and visualization, facilitating deeper insights into system behavior and performance metrics.
- Implemented PowerShell scripts to automate the deployment and configuration of analysis tools within the lab environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
