HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed Python scripts to automate data extraction and transformation for financial risk reporting, reducing manual processing time by approximately **40%**.
- Designed and implemented ETL data pipelines using Python and SQL for ingesting and unifying capital markets risk portfolio and NAV data into an internal notation.
- Analyzed large datasets to identify and escalate breaches in risk portfolio positions, developing exception detection routines to flag anomalies for prompt handling.
- Contributed to the enhancement of data analysis processes through automation, improving the efficiency of risk management workflows.
- Wrote and refactored Python code, utilizing AI agents for debugging and optimizing scripts for clarity and performance.
- Managed and analyzed data from proprietary formats into a unified internal notation for risk analysis, ensuring accuracy for UCITS/AIFMD compliance.
- Containerized Python data analysis applications using **Docker**, deploying them to **AWS EC2** instances for scalable processing.

SKILLS

Programming – Python, SQL, Bash

Data Analysis & Engineering – Data Wrangling, ETL, Data Pipelines, Risk Analysis, Statistical Analysis, Data Modelling

Cloud & Infrastructure – AWS, Docker, Linux

Tools & Technologies – Jira, Confluence, Git, AI Agents

Financial Markets – Capital Markets, Risk Management, UCITS, AIFMD, Portfolio Data, NAV Data

PROJECTS

Capital Markets Data Unification Platform

- Engineered Python-based ETL pipelines to ingest and transform diverse capital markets risk and NAV data into a standardized internal format.
- Developed SQL scripts for data validation and enrichment, ensuring data integrity for UCITS/AIFMD risk analysis.
- Implemented automated routines for exception detection and handling, reducing manual review of data anomalies by **30%**.

Risk Breach Detection & Automation Service

- Built Python routines to automate the analysis of risk portfolio positions, identifying and escalating potential breaches against defined thresholds.
- Created data wrangling scripts to process large datasets, enabling faster identification of critical risk indicators for senior management.
- Refactored existing scripts to improve performance and maintainability, integrating basic AI agent assistance for debugging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
