PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built end-to-end features using **AI coding tools**, translating initial concepts into live products for real users.
- Shipped and iterated on product designs based on user feedback and analytics, identifying and fixing broken user flows.
- Defined and tracked key metrics for shipped features, enabling data-informed decision-making and iterative improvements.
- Managed product scope by clearly defining what was included and excluded to ensure timely delivery of core functionality.
- Collaborated with a small, fast-moving team to ship new product iterations weekly, taking ownership of individual components from sketch to deployment.
- Developed REST APIs using **Java Spring Boot** to integrate disparate systems, ensuring seamless data flow and functionality.
- Containerized applications using **Docker** and deployed them to cloud environments, ensuring scalability and manageability.

SKILLS

Product Design & Development – End-to-end feature building, AI coding tools, User feedback analysis, Metric tracking, Scope management, Agile shipping.

Backend Development – Java, Spring Boot, REST APIs, Microservices, Docker, Cloud deployment.

Databases & APIs – SQL, PostgreSQL, MySQL, Oracle, API integration.

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data modelling, R, RStudio.

Programming Languages – Python, Java, SQL, R, TypeScript.

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Jenkins, Git.

PROJECTS

AI-Assisted Product Feature Development

- Developed a new user onboarding flow for an enterprise SaaS product using AI coding assistants, reducing initial setup time by **40%**.
- Implemented interactive data visualization components using **Power BI** to track user engagement with newly launched features, providing insights to product managers.
- Iteratively refined the design and functionality based on A/B testing results and direct user feedback, shipping three major updates within six months.

Customer Support Automation Tool

- Built a Python-based tool to automate the triaging of customer support tickets, categorizing and routing ~150 tickets daily to the appropriate teams.
- Integrated the tool with internal ticketing systems via REST APIs, improving response times by an estimated **20%**.
- Designed and implemented a simple relational data model in **PostgreSQL** to store ticket metadata and resolution outcomes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
