PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and programmed **PLC systems** using **Rockwell Studio 5000** for a manufacturing client's new automated assembly line, ensuring seamless integration with existing machinery.
- Commissioned **SCADA/HMI solutions** on-site for a life sciences customer, developing custom interfaces in **FactoryTalk View** to monitor and control critical process parameters.
- Managed project scope, budget, and customer commitments for automation upgrades, successfully delivering three key projects within the allocated timelines and financial constraints.
- Translated complex customer manufacturing processes into detailed **automation requirements** and practical solutions, collaborating closely with operations teams to ensure alignment.
- Planned and directed the work of two junior engineers on a **MES integration project**, providing technical guidance, reviewing code, and facilitating their skill development in control systems programming.
- Troubleshot and optimized **automated control systems** on customer sites, identifying root causes of performance issues and implementing effective software and hardware adjustments.
- Containerized automation control software components using **Docker** for standardized deployment across varied customer environments, improving installation consistency and reducing setup times.

SKILLS

PLC Platforms – Rockwell Studio 5000, Siemens TIA Portal

SCADA/HMI Platforms – FactoryTalk View, Ignition, WinCC

MES & Batch Control – MES, Batch Control, Validation

Programming Languages – Ladder Logic, Structured Text, C# (for HMI scripting)

Cloud & Containerization – Docker, AWS (EC2, S3)

Project Management – Scope Management, Budget Management, Customer Relationship Management

Engineering Degree – Level 8 Honours Engineering Degree

PROJECTS

Automated Pharmaceutical Batch Control System

- Designed and programmed **PLC logic** in **Siemens TIA Portal** for a new pharmaceutical production line, managing batch recipes and critical environmental controls.
- Developed **HMI screens** in **WinCC** to provide operators with real-time monitoring and interactive control over the batch processing equipment, including alarm management.
- Collaborated with the client's validation team to ensure the automation solution met stringent **pharmaceutical manufacturing** compliance and regulatory standards.

Life Sciences SCADA/HMI Deployment

- Led the on-site **commissioning** of an **Ignition SCADA** system for a medical device manufacturing facility, integrating data from multiple PLCs and sensors.
- Configured **data logging** and reporting features within Ignition to support process analysis and quality assurance, enabling the client to track key performance indicators.
- Provided technical training to the customer's engineering team on system operation and basic troubleshooting, ensuring a smooth handover and ongoing system management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
