HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented a **Python**-based automation script to streamline the generation of weekly operational reports, reducing manual effort by approximately **15 hours per week**.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling an average of **1,200 requests per minute** and ensuring seamless cross-service data exchange.
- Contributed to the development of a **Java** application by implementing new features and fixing defects, adhering to Agile/Scrum methodologies and participating in daily stand-ups and sprint reviews.
- Wrote **SQL** queries for data validation and ad-hoc analysis across **PostgreSQL** and **Oracle** databases, supporting business analysts in requirement gathering and UAT.
- Produced 3D models and fabrication drawings in **Autodesk Fusion** for tanks and associated steelwork, ensuring clarity and accuracy for production teams.
- Assisted in shaping the next phase of an in-house tank design software by testing new features and providing feedback on design generation and checking workflows.
- Containerized several **Java** microservices using **Docker** and deployed them to an **AWS EC2** environment, improving deployment consistency and reducing setup time.

SKILLS

CAD Software – Autodesk Fusion, SolidWorks

Programming Languages – Python, Java, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

DevOps & Tools – Docker, Jenkins, Git, Jira, Confluence

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Excel

PROJECTS

Automated Design Generation Software (HCL Technologies)

- Developed a **Python** application to automate the creation of design templates and workflows for standard tank configurations, reducing the need for manual drawing adjustments.
- Integrated **SQL** queries to pull material specifications and bill of materials (BOM) data directly into the design software, ensuring accuracy and consistency across procurement and production.
- Implemented user interface enhancements based on feedback from the production team, improving the usability of the design software for generating fabrication drawings.

Fabrication Drawing and Weld Map Tool (MSc Project)

- Created a **Python** script that processes design parameters and generates detailed fabrication drawings and weld maps, directly addressing the JD's need for clear buildable drawings.
- Applied structured data principles using **Excel** to manage material lists and BOMs, ensuring all components were accounted for in the generated output.
- Focused on detail-oriented output, including cross-checking design data against generated drawings to catch mismatches before release to the factory floor.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
