PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable data pipelines on **Databricks** using **PySpark** and **Delta Lake**, processing terabytes of data daily for downstream analytics.
- Developed and maintained ETL/ELT processes, transforming raw data into curated datasets adhering to **Medallion architecture** (Bronze, Silver, Gold) layers.
- Optimised **Spark jobs** and configured **Databricks clusters** for enhanced performance and cost-efficiency, reducing processing times by an average of **30%**.
- Collaborated with business stakeholders to translate requirements into robust data solutions, ensuring alignment with strategic objectives and data governance standards.
- Implemented data quality checks and governance practices, integrating **Unity Catalog** for centralized metadata management and access control across the Lakehouse.
- Established **CI/CD pipelines** for data platform deployments, incorporating Git for version control and adhering to modern engineering best practices.
- Containerised data processing modules using **Docker** and orchestrated deployments on **AWS EKS**, ensuring reliable and scalable execution of data workflows.

SKILLS

Data Platform – Databricks, Delta Lake, Lakehouse Architecture, Unity Catalog, Databricks Workflows, Delta Live Tables

Data Processing – PySpark, Spark SQL, Spark Jobs, ETL, ELT

Cloud Platforms – AWS (EC2, S3, EKS, CloudWatch), Azure, GCP

Programming & Scripting – Python, SQL, Bash Scripting

DevOps & CI/CD – Jenkins, Git, Docker, Terraform, Infrastructure as Code

Data Governance & Quality – Data Quality, Data Governance, Metadata Management

Orchestration & Streaming – Airflow, Structured Streaming, Kafka

PROJECTS

Enterprise Data Lakehouse Modernisation (HCL Technologies)

- Engineered a modern **data lakehouse** architecture on **Databricks**, migrating legacy data processing workflows from on-premise systems.
- Implemented **Delta Lake** tables and **Medallion architecture** patterns (Bronze, Silver, Gold) to ensure data quality and reliability for over 500 GB of daily ingested data.
- Developed Python scripts for data ingestion and transformation, creating robust **ETL pipelines** that supported business intelligence reporting and advanced analytics initiatives.

Real-time Analytics Pipeline with Spark Streaming (MSc Project)

- Built a **real-time analytics pipeline** using **Spark Streaming** and Kafka to process streaming financial transaction data, achieving a processing latency of under **500ms**.
- Designed and implemented data models within the Silver and Gold layers of the **Medallion architecture** to facilitate near real-time reporting and dashboarding.
- Tuned **Spark jobs** for optimal performance, handling an average of **2,000 events per second** during peak processing times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
