PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, implemented, and maintained **infrastructure systems** for **healthcare managed service accounts**, ensuring operational stability and adherence to service level requirements.
- Monitored **system performance** across **Linux** and **Windows Server** environments, proactively identifying and resolving potential issues before they escalated into critical incidents.
- Responded to and managed **infrastructure incidents** and support requests within a **Datacenter** environment, prioritizing based on customer and business impact.
- Managed **change control processes** for infrastructure updates, including risk assessment, testing, and rollback planning for **Windows Server 2019/2022** deployments.
- Developed and maintained comprehensive **documentation** for systems, configurations, and procedures, supporting knowledge-sharing and operational efficiency within the team.
- Applied **security best practices**, including patch management and access control, to protect sensitive data and ensure compliance with regulatory requirements.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances, managing CI/CD pipelines with **Jenkins**.

SKILLS

Operating Systems – Linux, Windows Server 2012, Windows Server 2016, Windows Server 2019, Windows Server 2022

Virtualization – VMware vSphere

Microsoft Technologies – Active Directory (AD), DNS, DHCP, RDS, File Services, Certificate Services (PKI), Server Administration

Infrastructure & Cloud – AWS (EC2, S3, Lambda, CloudWatch), Docker, Datacenter Operations, Compute, Storage

Networking – Routing, Firewall, Wireless AP, General Networking

ITSM Processes – Incident Management, Problem Management, Change Management

Programming & Scripting – Java, Spring Boot, Python, Shell Scripting

PROJECTS

Enterprise Linux & Windows Server Infrastructure Support

- Provided production support for a large-scale **Linux** and **Windows Server** environment, focusing on **system monitoring** using **Splunk** and **Dynatrace**.
- Automated routine system administration tasks and log analysis using **Python scripting** and **shell scripting**, reducing manual intervention by approximately **30%**.
- Managed incident response for P1/P2 issues, performing root cause analysis and implementing corrective actions to maintain service uptime for enterprise applications.

AWS Cloud Infrastructure & CI/CD Automation

- Containerized **Java Spring Boot** applications using **Docker** and deployed them to **AWS EC2** instances, enabling scalable and reliable service delivery.
- Configured and maintained **Jenkins** pipelines for automated builds, testing, and deployments, reducing deployment cycle time by an average of **45%**.
- Managed cloud resources on **AWS**, including EC2 instances, S3 buckets, and CloudWatch monitoring, ensuring efficient resource utilization and cost management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
