PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and maintained **Windows Server 2019/2022** and **Linux** operating systems within a healthcare managed service environment, ensuring high availability for critical applications.
- Responded to and resolved **P1/P2 incidents** and support requests within defined SLAs, performing root cause analysis and implementing corrective actions.
- Designed and implemented infrastructure systems supporting internal operations and customer environments, including **VMware vSphere** and physical compute/storage.
- Collaborated with customer stakeholders to ensure infrastructure met operational and service level requirements, applying **security best practices** including patch management.
- Maintained accurate documentation of systems, configurations, and procedures, contributing to knowledge-sharing within the team through **runbook creation**.
- Managed change control processes for infrastructure updates, including risk assessment, testing, and rollback planning for **datacenter hardware** and software.
- Participated in on-call rotations to provide 24/7 support for the infrastructure hosting estate, addressing urgent issues and minimizing business impact.

SKILLS

Operating Systems – Linux, Windows Server 2012, Windows Server 2016, Windows Server 2019, Windows Server 2022, File Services, PKI, AD, DNS, DHCP, RDS

Virtualization – VMware vSphere

Infrastructure Management – Compute, Storage, Datacentre, HPE Compute/Storage, SCCM, Enterprise/Event Management

Support Processes – Incident Management, Problem Management, Change Management, Troubleshooting Techniques, On-call Rotation, Post-Incident Reviews

Networking – General Networking, Routing, Firewall, Wireless AP

Backup & Recovery – Veeam Backup Technologies

Databases – SQL Server

PROJECTS

Healthcare Infrastructure Support Enhancement (HCL Technologies)

- Enhanced production support for critical healthcare applications by implementing proactive monitoring using **Splunk** and **Dynatrace**, reducing P1 incidents by 15% over six months.
- Developed Python scripts to automate routine system checks and reporting for a 500+ node Linux server fleet, decreasing manual effort by approximately 8 hours per week.
- Managed change control processes for system configuration updates, coordinating UAT and post-go-live support across interconnected enterprise systems.

Datacenter Compute & Storage Upgrade Project

- Assisted in the design and implementation of infrastructure systems, including fault finding and part replacement within physical **compute and storage** hardware.
- Gained working knowledge of **VMware** environments and Windows Server administration, supporting the migration of services to a virtualised platform.
- Applied general troubleshooting skills to resolve hardware-related issues, ensuring minimal disruption to service delivery.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
