PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed scalable solutions for managing **PostgreSQL** and **MySQL** databases within Kubernetes clusters, ensuring high availability for core services.
- Collaborated with engineering teams to identify and resolve performance bottlenecks in large-scale, **high-availability database infrastructure**, improving query response times by an average of **18%**.
- Led the migration of 5 critical database services from **VMs to Kubernetes**, achieving a seamless transition with less than **5 minutes** of downtime per service.
- Implemented and managed comprehensive **observability, logging, and alerting systems** using Prometheus and Grafana, reducing critical incident detection time by **40%**.
- Supported **disaster recovery and backup strategies** for on-premise database systems, conducting regular test restores to validate data integrity and recovery procedures.
- Developed **Bash and Python scripts** to automate infrastructure management tasks, including provisioning, configuration updates, and routine maintenance, saving approximately **10 hours** of manual effort per week.
- Managed infrastructure in **10 Points of Presence (PoPs)** across 3 continents, ensuring consistent deployment and operation of database services.

SKILLS

Databases – PostgreSQL, MySQL, Cassandra, Kafka, RabbitMQ, Redis, OpenSearch

Orchestration – Kubernetes, Ansible, Terraform

Scripting – Bash, Python

Observability – Prometheus, Grafana, ELK stack

Cloud – AWS, GCP, Azure, IBM Cloud

Service Discovery – Consul

PROJECTS

Kubernetes Database Migration and Management

- Orchestrated the migration of multiple **PostgreSQL** and **MySQL** instances from virtual machines to a managed **Kubernetes** environment, focusing on zero-downtime deployments.
- Implemented automated backup and recovery solutions for stateful applications within Kubernetes, ensuring data resilience and adherence to **disaster recovery** protocols.
- Configured **Prometheus and Grafana** for comprehensive monitoring of database performance and resource utilization, enabling proactive identification of potential issues.

Automated Infrastructure Provisioning with Terraform and Python

- Developed **Terraform** modules to provision and manage cloud infrastructure across **AWS** and **GCP**, including compute, networking, and database services.
- Wrote **Python scripts** to automate the configuration and deployment of applications onto the provisioned infrastructure, reducing deployment times by **30%**.
- Integrated custom health check scripts into the CI/CD pipeline to ensure the stability of deployed services before marking them as production-ready.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
