HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **developer tools** and **AI agents**, integrating them into CI/CD pipelines to automate failure investigation and suggest fixes, improving engineer feedback loops by an estimated **30%**.
- Implemented **automated pull request reviews** using custom scripts and AI coding tools, focusing on evaluating finding accuracy and reducing noise for reviewers, leading to a **20%** reduction in manual review time for common issues.
- Engineered **code quality scripts** to monitor complexity, function size, dependency cycles, and performance regressions, collaborating with package owners to establish practical thresholds and guide refactoring efforts.
- Enhanced **development environments** and **build/release workflows** using containerization and scripting, ensuring engineers and agents could reliably verify changes and reducing integration friction.
- Designed and deployed **Python automation scripts** for data validation and scheduled reporting within the financial services operations dashboard, processing approximately **5,000** daily records.
- Supported and integrated with enterprise business systems, including ERP modules, managing change control for configuration updates and coordinating UAT across interconnected systems.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation.

SKILLS

Languages – JavaScript, TypeScript, Python, Java, SQL, R, Bash

Frameworks/Libraries – Node.js, Spring Boot, pandas, NumPy, scikit-learn, React, Angular

AI/ML Tools – AI Agents, AI Coding Tools, LangChain, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes (concepts)

Databases – PostgreSQL, MySQL, Oracle

Developer Tools – Jira, Confluence, Splunk, Dynatrace, CI/CD, Automated Testing, Debugging

Analytics/BI – Power BI, Tableau, DAX, Power Query, RStudio, Data Modelling

PROJECTS

AI-Powered CI Failure Diagnostics Tool

- Developed a Python-based tool that integrates with CI/CD pipelines to analyze build failures, leveraging AI coding assistants to identify root causes and suggest code-level fixes.
- Implemented automated checks for common regressions, including dependency conflicts and performance degradation, reducing manual debugging time by approximately **25%** for the development team.
- Designed a user-friendly interface for developers to interact with diagnostic findings and apply suggested fixes, improving adoption rates across a team of **15** engineers.

Automated Code Quality and Refactoring Assistant

- Built a suite of scripts in TypeScript and Node.js to enforce code quality standards, including complexity limits and dependency analysis, for a large Node.js monorepo.
- Integrated AI agents to proactively identify areas for refactoring and provide code suggestions, contributing to a **15%** decrease in code churn over a 3-month period.
- Developed documentation and conducted training sessions for engineering teams on utilizing the new code quality tools, ensuring consistent application of standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
