HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Built and maintained developer tools and CI/CD pipelines using **JavaScript** and **Node.js**, reducing integration friction for application teams by approximately **20%**.
- Developed code quality scripts and automated checks for complexity and dependency cycles, collaborating with package owners to establish practical thresholds and targeted refactoring efforts.
- Improved automated pull request review processes by evaluating finding accuracy and reducing noise, leading to a more efficient code review cycle for engineering teams.
- Integrated AI agents into engineering workflows to investigate CI failures and diagnose compatibility regressions, providing engineers with actionable evidence for quicker resolution.
- Enhanced development environments and build workflows by implementing systematic debugging for test and integration failures, ensuring reliable verification of changes.
- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, including robust request validation and circuit-breaker patterns to improve system resilience.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and adhering to strict SLAs in a regulated environment.

SKILLS

Languages – JavaScript, TypeScript, Node.js, Java, Python, SQL, R

Developer Tools – Git, Jenkins, Jira, Confluence, Docker

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), CI/CD, Jenkins

Databases – PostgreSQL, MySQL, Oracle

AI & Automation – AI agents, CI automation, Python scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

PROJECTS

Developer Tooling Enhancement Suite

- Developed a suite of **Node.js** scripts to automate common developer tasks, including code linting, dependency analysis, and environment setup, adopted by 4 engineering teams.
- Integrated an AI assistant into the CI pipeline to analyze build failures and suggest potential fixes, reducing average debugging time for critical issues by **15%**.
- Created automated tests for core developer tooling to ensure reliability and maintainability, improving deployment success rates for new tool versions.

Automated Code Quality and Review System

- Engineered a **TypeScript**-based system that automatically enforces code quality standards and flags architectural deviations in pull requests, processing over **500 pull requests** weekly.
- Implemented custom static analysis checks for complexity and adherence to design patterns, reducing the number of manual review comments related to these areas by **~30%**.
- Designed a feedback mechanism for the automated review system to capture user input and drive continuous improvement, enhancing developer trust and adoption.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
