HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented conceptual, logical, and physical data models in **Snowflake**, supporting analytics and reporting requirements for enterprise data products.
- Developed and maintained high-quality, analytics-ready datasets using **Python** and **SQL**, ensuring data integrity and accessibility for business stakeholders.
- Built and managed scalable, cloud-native data pipelines on **AWS**, integrating streaming technologies to process near real-time data feeds.
- Collaborated with business and technical stakeholders to translate complex requirements into effective **data solutions**, facilitating informed decision-making.
- Implemented data quality, governance, and security standards across data assets, ensuring compliance and reliability in a production environment.
- Automated deployment processes using **CI/CD** pipelines and managed infrastructure-as-code principles, improving development velocity and system reliability.
- Supported and continuously improved critical production data platforms, ensuring high availability and performance for key analytics workloads.

SKILLS

Data Modeling – Conceptual, Logical, Physical, Dimensional, Snowflake

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch, Kinesis

Data Warehousing – Snowflake, Data Lake, ETL, Data Pipelines

Programming Languages – SQL, Python

DevOps & Tools – Git, CI/CD, Jenkins, Docker, Terraform

Databases – Operational Databases, Relational Databases

PROJECTS

Scalable Data Platform Modernization on AWS

- Engineered data pipelines using **Python** and **AWS Kinesis** to ingest and process high-volume streaming data, reducing latency for critical reporting.
- Designed and implemented dimensional data models within **Snowflake** to support analytics and forecasting, improving query performance by an average of **30%**.
- Integrated automated testing and **CI/CD** practices into the data pipeline deployment process, enhancing reliability and reducing deployment times.

Enterprise Data Warehouse Enhancement

- Developed complex **SQL** queries and stored procedures for data transformation and aggregation, supporting an operational dashboard for financial services clients.
- Applied data quality and monitoring practices to ensure the accuracy and consistency of data within the warehouse, resolving **~15** data integrity issues per sprint.
- Refactored existing ETL processes using **Python** scripts to improve efficiency and maintainability, cutting processing time by approximately **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
