HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and deployed **Java Spring Boot** microservices on **AWS EC2** instances, developing RESTful APIs for core business logic and ensuring seamless integration with PostgreSQL.
- Implemented **JPA** and Hibernate entities for object-relational mapping, managing data persistence and complex query execution against enterprise databases, reducing data retrieval times by **18%**.
- Developed **JUnit** and Mockito test suites for Java applications, achieving over **85%** code coverage for critical modules and enhancing system stability during integration.
- Configured and managed **Terraform** modules for provisioning and managing Azure cloud infrastructure, including **VNets**, **ExpressRoute** connections, and network security groups, standardizing environment deployments.
- Designed and implemented **Azure Policy** and **Defender for Cloud** configurations to enforce security standards and monitor compliance across cloud resources, mitigating **20+** high-risk security alerts monthly.
- Containerized applications using **Docker** and managed deployments on **Kubernetes** clusters, integrating with CI/CD pipelines for automated build, test, and deployment cycles.
- Automated routine system administration tasks on **Linux** servers using **Python** scripting and shell commands, reducing manual intervention for log analysis and cron job management by **40%**.

SKILLS

Cloud Platforms – Azure, AWS

Infrastructure as Code – Terraform, Terraform Enterprise

Containerization & Orchestration – Docker, Kubernetes, OpenShift

Networking & Security – Azure Networking, ExpressRoute, VNets, Firewalls, Azure Policy, Defender for Cloud, Sentinel

CI/CD & Automation – Jenkins, Maven, Ansible, Git

Programming & Scripting – Python, Java, Go

Operating Systems – Linux, UNIX

PROJECTS

Azure Cloud Infrastructure Automation with Terraform

- Developed reusable **Terraform** modules to provision and manage Azure infrastructure, including **VNet** configurations, subnets, and firewall rules for secure application deployment.
- Integrated **Terraform Enterprise** with Jenkins pipelines to enable automated, policy-driven infrastructure deployments and updates across multiple development and production environments.
- Implemented **Azure Policy** to enforce compliance requirements such as resource tagging and allowed VM SKUs, ensuring adherence to organizational standards for over **50** deployed resources.

Containerized Microservices Deployment on Kubernetes

- Designed and implemented **Docker** container images for multiple **Java Spring Boot** microservices, ensuring consistent runtime environments.
- Deployed and managed containerized applications on an **OpenShift** cluster, configuring deployments, services, and ingress controllers for high availability.
- Developed basic **Ansible** playbooks to automate the configuration of Kubernetes nodes and manage application dependencies within the cluster environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
