HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and deployed **Golang** microservices for a high-throughput payments platform, handling approximately **5,000 transactions per second** during peak loads.
- Developed **gRPC** services to facilitate low-latency communication between distributed system components, reducing inter-service call times by **40%**.
- Implemented automated CI/CD pipelines using **Jenkins** and **Git** for consistent build, test, and deployment cycles of microservices, cutting deployment time by **35%**.
- Wrote **Python** scripts to automate data extraction and transformation tasks for reporting, supporting the reconciliation workflows for a financial-services client.
- Designed and maintained **Java Spring Boot** RESTful APIs for cross-system integrations, ensuring seamless data flow between enterprise business systems.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 alerts and performing root cause analysis within strict SLA targets.
- Containerized microservices using **Docker** and managed deployment configurations for a Kubernetes cluster, ensuring consistent runtime environments.

SKILLS

Languages – Go, Java, Python, SQL, Bash

Frameworks/APIs – Spring Boot, RESTful APIs, gRPC, Microservices

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, MongoDB

Tools & Methodologies – Terraform, Ansible, Splunk, Dynatrace, Jira, Agile, Scrum

PROJECTS

Golang Microservice for Transaction Processing

- Developed a **Golang**-based microservice to handle real-time payment transaction processing, designed for high throughput and sub-millisecond latency.
- Integrated with **PostgreSQL** for persistent storage of transaction data, implementing efficient indexing strategies to optimize query performance.
- Containerized the service using **Docker** and deployed it to a Kubernetes environment, establishing automated health checks and scaling policies.

Python-based ETL for Financial Operations Dashboard

- Created **Python** ETL pipelines to ingest and transform data from multiple sources for a financial-services operations dashboard, supporting reconciliation workflows.
- Automated scheduled reporting tasks using Python scripts, reducing manual effort by approximately **70%** for the operations team.
- Collaborated with business analysts to gather requirements for data feeds and ensure data accuracy and completeness for operational monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
