PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed a team of 4 IT Operations Technicians, overseeing daily task allocation, shift scheduling, and performance feedback to ensure adherence to campus operational SLAs.
- Oversaw campus-level IT operations, ensuring full attainment of on-site service level agreements within specified time frames, leading to a 15% reduction in critical incident response times.
- Provided hands-on technical guidance and training to the IT Operations team, improving their proficiency in server hardware diagnostics and standard operating procedure adherence.
- Identified and consolidated latent risks within campus IT operations, driving closure of identified issues and supporting the development of campus-specific solutions.
- Aggregated and escalated campus-level IT operations issues, driving cross-team follow-up and remediation with infrastructure and quality assurance teams.
- Participated in the build-out of IT operations platforms by submitting requirements and supporting testing, providing continuous on-site feedback to improve automation and operational transparency.
- Containerized Python-based automation scripts for IT operations tasks using **Docker**, enabling more consistent deployment across development and production environments on **AWS EC2**.

SKILLS

IT Operations Management – Team Management, Shift Scheduling, SLA Management, Risk Management, Process Control, Vendor Management

IT Infrastructure – Server Hardware Architectures (x86, ARM), Networking Fundamentals, Hardware Replacement, On-site Safety Protocols

Scripting & Automation – Python, Shell Scripting

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Tools & Platforms – Jira, Confluence, Jenkins, Splunk, Dynatrace, PagerDuty, Grafana

Data Analysis & Reporting – SQL, Power BI, DAX, Data Modelling, Operational Data Analysis

PROJECTS

Campus IT Operations Platform Enhancement

- Developed and documented Standard Operating Procedures (SOPs) for common IT hardware troubleshooting and replacement tasks, reducing onboarding time for new technicians by approximately 20%.
- Built Python scripts to automate log aggregation from various server components, facilitating faster root cause analysis for operational incidents and generating weekly summary reports.
- Designed and implemented a **Power BI** dashboard to visualize key campus IT operational metrics, including ticket resolution times and SLA attainment rates, providing insights for process optimization.

IT Infrastructure Automation with Python and AWS

- Automated the provisioning and configuration of **AWS EC2** instances for development and testing environments using **Python** scripting and the Boto3 SDK, reducing manual setup time by 75%.
- Implemented **Docker** containers for key operational scripts, ensuring consistent execution environments and simplifying deployment across different servers.
- Integrated automation scripts with **Jenkins** pipelines for scheduled execution and monitoring, improving the reliability of routine IT maintenance tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
