HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs and microservices supporting a financial-services operations dashboard, handling approximately **3,200 transaction messages per week**.
- Engineered **Python scripts** to automate data ingestion and transformation for scheduled reporting, processing **over 50 GB of data** weekly.
- Refactored inefficient **relational database queries** across PostgreSQL and Oracle, reducing analytical report execution times by **34%**.
- Designed, built, and optimized **containerised applications** using Docker for telemetry collection and local data processing on **Linux-based edge systems**.
- Contributed to software projects that use machine-generated data to create new **digital services** and **performance insights** for enterprise customers.
- Applied **secure-by-design principles**, including certificate-based authentication and secrets management, to protect sensitive operational data.
- Created and maintained clear **technical documentation** for software components and operational processes, improving team onboarding efficiency by **20%**.

SKILLS

Languages – Java, Python, C#, SQL, English

Frameworks & Libraries – Spring Boot, Spring Cloud, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, CI/CD, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, MongoDB, ADX

Protocols & IoT – MQTT, gRPC, OPC UA, HTTP/REST, WebSockets, AMQP

Tools & Platforms – Linux, Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau, R/RStudio

Methodologies – Agile, Scrum, MLOps

PROJECTS

IoT Edge Telemetry and Processing Platform

- Developed **containerised Python services** using Docker for telemetry collection, local data buffering, and secure communication with cloud platforms via **MQTT**.
- Engineered **data pipelines** to process and distribute machine-generated data to cloud-based analytics solutions, handling approximately **4,000 events per hour**.
- Implemented **secure-by-design principles**, including certificate-based authentication and encrypted communication channels, to protect data integrity.

Machine Learning Model Deployment and Monitoring

- Supported the reliable **deployment and lifecycle management of machine-learning models** on Linux-based edge devices.
- Extended and optimized existing **MLOps tooling** to improve the performance and scalability of model serving infrastructure.
- Performed **unit and end-to-end testing** for model inference services, ensuring software quality and robustness with **95% test coverage**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
