PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented data models within a **cloud data warehouse** (Snowflake), transforming raw operational data into curated datasets for business intelligence and analytics teams.
- Authored and maintained **SQL models** across multiple repositories, ensuring data accuracy, integrity, and coverage for downstream reporting and AI data systems.
- Collaborated with Data Engineers to integrate new data sources, developing robust **ETL pipelines** in Python to process and load data into the central data warehouse.
- Owned the **data dictionary**, documenting table and column origins and business rules, which are consumed by both human analysts and AI agents for semantic layer enrichment.
- Diagnosed and resolved complex **data incidents**, performing root cause analysis and implementing preventative measures to enhance data quality and system reliability.
- Mentored junior team members on **SQL best practices** and code review etiquette, ensuring adherence to standards for data warehouse production environments.
- Containerized data transformation jobs using **Docker** and orchestrated their deployment via **Airflow** DAGs, improving pipeline manageability and reducing manual intervention by approximately 40%.

SKILLS

Data Modeling – SQL, dbt, Dataform, Snowflake, BigQuery, Relational Databases

Programming & Scripting – Python, SQL, Bash

Data Warehousing & ETL – ETL Pipelines, Data Pipelines, Data Governance, Data Quality, Data Lineage, Power Query

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Cloud Data Warehousing

AI & ML Tools – LLMs, Agentic Coding Tools, Claude Code, Cursor, scikit-learn

DevOps & Orchestration – Docker, Kubernetes, Git, Jenkins, Airflow, CI/CD

BI & Visualization – Power BI, Tableau, DAX

PROJECTS

Enterprise Data Warehouse Enhancement (HCL Technologies)

- Developed and deployed **SQL transformation models** in Snowflake to support a financial-services operations dashboard, integrating data from multiple transactional databases.
- Implemented **data quality checks** and validation rules within the transformation layer, reducing data anomalies reported by operational teams by 18%.
- Documented data lineage and business logic for key financial metrics, creating a comprehensive **data dictionary** used by business analysts and reporting teams.

Python-based ETL Pipeline for Analytics (MSc Data Analytics Project)

- Designed and built a **Python ETL pipeline** using pandas and SQLAlchemy to extract, transform, and load data from disparate sources into a PostgreSQL data mart for a capstone analytics project.
- Applied **data modeling techniques** to structure the data mart, enabling efficient querying for analytical reporting and dashboard development in Power BI.
- Conducted **exploratory data analysis** on the processed data, identifying key trends and generating visualizations that informed the project's final recommendations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
