HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and deployed **multi-region Kubernetes clusters** on AWS (EKS) and on-premise infrastructure, managing custom CRDs and operators for application deployment and lifecycle management.
- Developed **Terraform modules** for provisioning and managing cloud and on-premise infrastructure, ensuring consistency and enabling a GitOps workflow across hybrid environments.
- Implemented comprehensive **distributed systems observability** using Prometheus, Grafana, and OpenTelemetry, establishing SLOs and error budgets to monitor system health and performance for five-nines availability targets.
- Engineered **zero-trust network segmentation** and access controls, integrating with identity providers and implementing fine-grained authorization policies to meet SOC2 and ISO 27001 compliance requirements.
- Designed and implemented **AI-powered auto-remediation strategies** for common production incidents, reducing manual intervention time by approximately 40% and improving Mean Time To Recovery (MTTR).
- Containerized core platform services using **Docker** and orchestrated deployments on Kubernetes, managing Helm charts for configuration and rolling updates.
- Authored **AI-generated runbooks** and automated root-cause analysis procedures, streamlining incident response and knowledge sharing for the platform engineering team.

SKILLS

Platform Engineering – Kubernetes, Custom Operators, CRDs, Multi-Region Deployments, Active-Active Systems, Zero-Trust Architecture, ISO 27001, SOC2, GDPR

Observability & SRE – Prometheus, Grafana, OpenTelemetry, SLOs, Error Budgets, Auto-Remediation, Root Cause Analysis, PagerDuty

Infrastructure as Code – Terraform, Helm, GitOps

Cloud & Containerization – AWS, EKS, Docker, Hybrid Cloud Environments

Programming & Scripting – Python, Bash Scripting

Databases & Messaging – PostgreSQL, Kafka

PROJECTS

Multi-Region Kubernetes Platform for Financial Services

- Designed and deployed a **multi-region Kubernetes** (EKS) cluster architecture to support high-availability financial services applications, ensuring active-active resilience.
- Integrated **Terraform** for declarative infrastructure provisioning and managed application deployments using **Helm** charts, establishing a robust GitOps workflow.
- Implemented end-to-end **observability** with Prometheus and Grafana, setting up alerts for critical system metrics and performance indicators.

AI-Driven Incident Response Automation

- Developed Python scripts to analyze logs from **Splunk** and **CloudWatch**, identifying patterns indicative of common P1/P2 incidents for an enterprise client.
- Built an **auto-remediation** service using AWS Lambda that automatically resolved ~30% of recurring infrastructure alerts, significantly reducing manual SRE workload.
- Authored comprehensive runbooks and diagnostic guides based on historical incident data to improve the efficiency of the on-call support team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
