HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs to facilitate cross-service data exchange, incorporating request validation and circuit-breaker patterns for enhanced system resilience.
- Engineered **Python** scripts to automate ETL processes and generate scheduled reports, reducing manual data processing time by approximately **40%** for the operations team.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and maintaining service level agreements for critical financial operations dashboards.
- Led the technical execution of key observability platform components, including migration to **S3-based data lakes** and integration of **OpenTelemetry** instrumentation, improving data accessibility and reducing sprawl.
- Developed and maintained **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment, contributing to a **20%** reduction in deployment cycle time.
- Containerized microservices using **Docker** and deployed them to **Kubernetes** clusters on **AWS**, managing configuration with Helm charts and defining resource limits for predictable performance.
- Provided architectural guidance and thought leadership across platform engineering teams, establishing clear telemetry standards and scalable platform abstractions for observability signal management.

SKILLS

Observability & Monitoring – OpenTelemetry, Splunk, Dynatrace, CloudWatch, Logging, Metrics, Tracing, Profiling

Programming Languages – Python, Java, SQL, Shell Scripting

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker, Linux

CI/CD & DevOps – Jenkins, Git, Helm, Infrastructure-as-Code

Data & Databases – PostgreSQL, MySQL, Oracle, ClickHouse, S3 Data Lakes

Frameworks & APIs – Spring Boot, REST APIs, FastAPI

PROJECTS

Observability Platform Modernization (HCL Technologies)

- Engineered a scalable telemetry ingestion pipeline using **Python** and **Kafka**, processing over **5,000 events per second** to feed real-time metrics and logs into a centralized data lake.
- Developed **REST APIs** with **FastAPI** for querying aggregated observability data, enabling faster incident response and performance analysis for internal engineering teams.
- Containerized the observability services using **Docker** and orchestrated deployments on a **Kubernetes** cluster, ensuring high availability and efficient resource utilization.

Financial Transaction Monitoring System (HCL Technologies)

- Built a **Java Spring Boot** application to monitor transaction flows within a financial services operations dashboard, identifying and alerting on approximately **3,200 failed payments per week**.
- Implemented data validation and reconciliation workflows using **SQL** across **PostgreSQL** and **Oracle** databases to ensure data integrity for critical financial operations.
- Provided production support and incident triage for the transaction monitoring system, maintaining operational continuity and adhering to strict SLAs in a regulated environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
