PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for enterprise applications, focusing on REST API development and database integration with **JPA**.
- Implemented robust persistence layers using **Hibernate** and **JPA**, ensuring data integrity and efficient querying across relational databases for core business systems.
- Designed and implemented asynchronous processing workflows using **Java EE** patterns and **JUnit** for testing, improving system responsiveness and reducing batch processing times by **~18%**.
- Collaborated with cross-functional teams to define technical requirements and estimate effort for new feature development within an **Agile Scrum** framework.
- Participated in code reviews, providing constructive feedback to peers to maintain high code quality and adherence to architectural standards.
- Supported the implementation of approved automation improvements by documenting and standardising automated processes for packaging equipment, ensuring consistent operational output.
- Containerised backend Java services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and simplifying environment management.

SKILLS

Programming Languages – Java, Python, SQL, R, DAX, HTML, CSS

Frameworks & Libraries – Spring Boot, Spring, JPA, Hibernate, Flask, FastAPI, pandas, NumPy, scikit-learn, React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics – Power BI, Tableau, Power Query, Data Modelling, Data Warehousing, Statistical Analysis

Domain Specific – Automation Engineering, Manufacturing Processes, Packaging Operations, Equipment Reliability, Operational Efficiency, Process Mapping, Root-Cause Analysis, Continuous Improvement

PROJECTS

Manufacturing Process Automation Enhancement

- Analyzed packaging line automation workflows to identify key areas for reducing manual intervention and improving operator efficiency, contributing to a **~15%** reduction in manual touchpoints for critical tasks.
- Developed Python scripts to automate data collection and analysis of Overall Equipment Effectiveness (OEE) metrics, generating daily performance reports that highlighted downtime patterns for the process engineering team.
- Mapped existing manufacturing processes, identifying and documenting non-value-added activities that were subsequently prioritized for targeted waste-reduction initiatives.

Enterprise Systems Integration & Support

- Engineered REST APIs using **Java Spring Boot** to facilitate data exchange between an ERP system and an inventory management platform, supporting cross-system integrations for improved data flow.
- Managed change control processes for configuration updates on enterprise business systems, coordinating User Acceptance Testing (UAT) and providing post-go-live support across interconnected platforms.
- Wrote SQL scripts to validate data consistency and perform schema changes within **PostgreSQL** databases supporting critical business operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
