HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Node.js** backend services and **REST APIs** on **AWS Lambda**, processing approximately **3,000 requests per minute** for core platform features.
- Integrated **LLM APIs**, including prompt engineering and response parsing, into a production SaaS application to automate legal document generation, reducing manual effort by an estimated **40%**.
- Designed and implemented a **RAG** (Retrieval-Augmented Generation) system using **MongoDB** for storing embeddings and relevant document chunks, significantly improving the accuracy of AI-generated legal summaries.
- Wrote **TypeScript** unit and integration tests for **Next.js** frontend components and **Node.js** backend modules, achieving over **85% code coverage** for critical application logic.
- Collaborated with product managers and stakeholders to gather requirements for new AI-powered features, translating business needs into actionable technical specifications for the development team.
- Containerized **Node.js** applications using **Docker** and deployed them to a managed Kubernetes cluster, managing deployments and rollbacks via **Jenkins** pipelines.
- Refactored legacy Java Spring Boot services to improve performance and maintainability, ensuring seamless integration with the new **Node.js** microservices architecture.

SKILLS

Frontend – Next.js, React, TypeScript, HTML, CSS

Backend – Node.js, Java, Spring Boot, REST APIs

Databases – MongoDB, PostgreSQL, MySQL, Oracle

AI/ML – LLM APIs, RAG, Prompt Engineering, Vector Databases, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Operations – Splunk, Dynatrace, Jira, Confluence, Linux Shell Scripting

PROJECTS

AI-Powered Legal Document Automation Platform

- Developed a **Next.js** frontend and **Node.js** backend to manage user requests and orchestrate AI document generation workflows.
- Integrated a **LangChain**-based RAG system with **MongoDB** to retrieve relevant legal precedents and data, improving the contextuality of generated documents.
- Implemented secure API endpoints for AI model interaction, handling approximately **1,500 generation requests** per day during peak usage.

Enterprise SaaS Platform Enhancement (HCL Technologies)

- Extended an existing **Java Spring Boot** application by developing new **REST APIs** to support enhanced reporting functionalities.
- Automated data extraction and transformation processes using **Python** scripts and **SQL** queries against **PostgreSQL** databases, reducing report generation time by **30%**.
- Containerized the Java application using **Docker** and configured **Jenkins** pipelines for automated builds and deployments to **AWS EC2** instances.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
