PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Collaborated with Sales teams to understand customer needs and translate them into technical requirements for SaaS solutions, ensuring technical feasibility for complex implementations.
- Developed comprehensive project scopes and detailed implementation plans, coordinating with internal stakeholders and external vendors for successful project delivery.
- Provided pre-sales technical assistance and product education to prospects and customers, articulating technical challenges and designing effective solutions.
- Led client engagements from initial discussions through to successful delivery, establishing and strengthening relationships by ensuring project timelines and quality standards were met.
- Analyzed client requirements and designed best-fit solutions leveraging expertise in software development principles and system integrations.
- Managed the planning, delivery, and implementation of innovative technology initiatives for clients, ensuring on-time and within-scope project execution.
- Containerized enterprise applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and monitoring performance via **CloudWatch**.

SKILLS

Core Technologies – SaaS, IoT, Software Development Principles, System Integrations, REST APIs

Sales & Client Engagement – Pre-sales Technical Assistance, Product Education, Requirements Gathering, Project Scoping, Client Relationship Management

Project Management – Project Planning, Implementation Management, Stakeholder Coordination, Vendor Management, Quality Assurance

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker

Programming & Scripting – Java, Python, SQL, Spring Boot

Observability & Support – Splunk, Dynatrace, Incident Response, SLA Management

PROJECTS

Retail IoT Platform Implementation for Enterprise Client

- Designed and implemented a proof-of-concept IoT solution for a retail client, integrating **cloud-based data ingestion pipelines** with their existing inventory management systems.
- Developed custom scripts in **Python** to process and analyze real-time sensor data from in-store devices, identifying patterns for optimizing stock levels and reducing waste.
- Coordinated with the client's IT operations team to deploy the solution on **AWS**, ensuring seamless integration and providing initial user training on the new system.

Customer-Facing Solutions Architecture for Commerce Digitization

- Architected a scalable, cloud-native solution for digitizing retail operations, focusing on **API-driven integrations** between customer-facing applications and backend services.
- Developed technical documentation and presentation materials, including system diagrams and feature walkthroughs, for pre-sales engagements with prospective retail clients.
- Assisted in the technical onboarding of new clients by translating their business objectives into actionable implementation steps and technical roadmaps.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
