PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python**-based ETL pipelines on **AWS Lambda**, processing over 10,000 records daily to populate internal data warehouses for analytics.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, handling approximately 400 requests per minute and ensuring consistent data flow between core business systems.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and resolving P1/P2 issues within defined SLA targets.
- Automated recurring reporting tasks using **Python** scripting, reducing manual effort by an estimated 15 hours per week for the financial operations team.
- Built and deployed AI-native workflows and agents to augment sales and CS operations, integrating **Python** scripts with CRM APIs to automate data enrichment and lead scoring.
- Collaborated with Sales, Partnerships, and Finance teams to translate business requirements into technical solutions, including system configurations and integration enhancements for CRM and CPQ platforms.
- Containerized microservices using **Docker** and deployed them to an **AWS EC2**-based environment, establishing basic CI/CD pipelines with **Jenkins** for automated builds and deployments.
