PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, handling approximately **5,000 requests per minute** during peak hours.
- Developed and maintained **Hibernate** entities and queries to support complex data persistence requirements for core financial services, ensuring data integrity across the platform.
- Wrote comprehensive **JUnit** and **Mockito** tests for Java microservices, achieving over **90% code coverage** and reducing production regressions by **15%**.
- Collaborated with cross-functional teams including product and finance to gather requirements and define technical specifications for new financial platform features.
- Participated in code reviews and mentored junior engineers on best practices in **Java** and **Spring Boot** development, improving team code quality.
- Managed and troubleshot production incidents for financial transaction systems, performing root cause analysis and implementing corrective actions to maintain operational stability.
- Containerized financial platform services using **Docker** and deployed them to a managed **Kubernetes** cluster on **AWS**, enabling more reliable and scalable deployments.

SKILLS

Languages – Python, Java, JavaScript, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, scikit-learn, pandas, NumPy, Flask, FastAPI, NestJS

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Financial Service Integration

- Developed a **Java Spring Boot** microservice to process and reconcile financial transaction data from multiple upstream systems, integrating with a **PostgreSQL** database.
- Implemented asynchronous message processing using a message queue pattern to handle high volumes of transaction updates, ensuring data consistency and fault tolerance for **~1,500 transactions per hour**.
- Designed and executed integration tests using **JUnit** to validate API contracts and data flow between the new service and existing enterprise applications.

Real-time Transaction Monitoring Dashboard

- Built a Python-based data pipeline to ingest and transform transaction logs from various sources into a format suitable for near real-time analysis, processing over **10,000 records daily**.
- Developed an analytical model using **scikit-learn** to identify anomalous transaction patterns, achieving an **AUC of 0.82** on historical data.
- Created interactive visualizations and alerts using **Python** libraries to present key transaction metrics and detected anomalies to operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
