HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for backend systems, implementing RESTful APIs and ensuring robust data persistence with **Hibernate**.
- Designed and implemented asynchronous processing workflows using **Python** and **Celery** to handle high-volume event streams, reducing batch processing times by **40%**.
- Managed production support for enterprise applications on **AWS**, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**.
- Designed and implemented reliable data flows between **Whippy** and external platforms, handling complexities of **authentication**, **rate limits**, and **retries** in distributed systems.
- Debugged and resolved non-trivial production issues across **webhooks**, **async workflows**, and **external APIs**, ensuring system stability and minimal downtime.
- Translated ambiguous customer requirements into clear technical designs and actionable implementation plans for new integrations, working closely with product and engineering teams.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and monitoring via **CloudWatch**.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, Python, Flask, FastAPI, Node.js, NestJS, REST APIs, Microservices

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data & Analytics – pandas, NumPy, scikit-learn, Power BI, Tableau, DAX, Power Query

System Integration – APIs, Webhooks, Asynchronous Processing, Distributed Systems, Error Handling, Rate Limiting, Authentication

Observability & Support – Splunk, Dynatrace, P1/P2 Incident Response, SLA Management

PROJECTS

Enterprise Integration Layer for Financial Services

- Engineered a **Java Spring Boot** application to integrate disparate enterprise systems, including a **PostgreSQL** database and external RESTful APIs for data synchronization.
- Implemented robust error handling and retry mechanisms for cross-system communication, ensuring data integrity for critical financial transaction workflows.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **90%** code coverage for core integration modules.

Customer Onboarding Automation for SaaS Platform

- Developed a **Python**-based automation suite to streamline the customer onboarding process for a new enterprise client, reducing manual setup time by an estimated **35%**.
- Designed and implemented a webhook listener to receive real-time events from customer systems, triggering automated configuration updates and data ingestion pipelines.
- Collaborated with the customer's technical team to define integration requirements and provide post-implementation support, ensuring a smooth transition to the new platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
