HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **AI-powered features** and tooling to automate repetitive implementation tasks for enterprise customers, integrating **LangGraph** and **LangChain** workflows.
- Contributed to the development of **production AI systems** on **AWS**, focusing on reliability and scalability for automated deployment guidance.
- Collaborated with **Product Management** and senior engineers to translate complex deployment challenges into actionable AI-driven solutions, working within an **agile** framework.
- Integrated **LLM-based capabilities** into existing deployment technology products, moving from initial prototypes to production-ready features.
- Built asynchronous task handling mechanisms for event-driven systems, improving data processing efficiency for AI model inference pipelines by **~18%**.
- Wrote **Python** scripts to automate data extraction and preparation for training machine learning models, processing datasets up to **500GB**.
- Containerized AI services using **Docker** and deployed them to a managed Kubernetes environment, ensuring consistent environments across development and production.

SKILLS

AI/ML Frameworks – LangGraph, LangChain, LangSmith, scikit-learn

Programming Languages – Python, Java, Rust, C++

Cloud Platforms – AWS, GCP, Azure

Data Technologies – SQL, PostgreSQL, Vector Databases, Data Warehousing

Development Tools – Docker, Kubernetes, Git, Jenkins, Jira

Methodologies – Agile, Scrum, Event-Driven Systems, Asynchronous Task Handling

PROJECTS

AI-Powered Configuration Automation Tool

- Developed a Python application integrating **LangChain** to automate complex Workday configuration tasks, reducing manual effort by an estimated **40%** for pilot users.
- Implemented RAG patterns to enable the AI to query and utilize internal documentation for generating accurate setup guidance, improving response relevance.
- Containerized the application using **Docker** for streamlined deployment on cloud infrastructure, ensuring portability across different environments.

LLM Integration for Deployment Guidance

- Built a REST API service using **FastAPI** in Python to expose an LLM for generating contextual deployment advice based on customer implementation data.
- Fine-tuned a foundational LLM on a curated dataset of deployment best practices, achieving a **15%** improvement in task completion success rate in simulations.
- Designed and implemented asynchronous processing for LLM requests to handle peak loads efficiently, maintaining p95 latency below **300ms**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
