HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored and refined complex enterprise logic into structured **AI skill definitions** for the Forward Intelligence team, partnering directly with **domain experts**.
- Operated within **AI-assisted development environments** (e.g., Cursor, Claude Code) to rapidly generate and refactor **prompt logic** and tool call definitions, reducing authoring time by an estimated **30%**.
- Integrated skills with backend systems by wiring up **enterprise REST APIs** and **MCP servers**, ensuring seamless agent execution across diverse data structures.
- Abstracted intricate business procedures into modular logic, optimizing **prompt structures** for minimal token consumption and enhanced execution reliability.
- Designed and implemented automated test suites to rigorously stress-test skill edge cases, API parameter bounds, and fallback logic, achieving over **95% test coverage** for critical workflows.
- Established best practices for self-serve authoring workflows and conducted code reviews for submitted skill pull requests, ensuring **schema compliance** and API integrity across the team.
- Curated benchmark evaluation datasets and implemented **LLM-as-a-Judge scoring** within CI/CD quality gates to validate skill accuracy and prevent regressions prior to production promotion.

SKILLS

AI/ML – Generative AI, LLM, Prompt Engineering, Function Calling, Agentic Specifications, Model Context Protocol (MCP), Evaluation-Driven Development (EDD), LLM-as-a-Judge

Backend Development – Python, TypeScript, REST APIs, JSON, YAML, Backend Services, Scripting, API Integrations

Tools & Platforms – Cursor, Claude Code, GitHub Copilot, Jenkins, Git, Jira, Confluence, AWS, Docker

Data & Systems – Structured Data Transformations, Systems Rigor, Enterprise Logic Codification

Methodologies – Agile, Scrum, Code Review, Test Suites, CI/CD

PROJECTS

Enterprise Logic Codification for AI Agent Skills

- Translated complex business logic and prose from subject matter experts into structured, executable **AI skill definitions** for an agent platform.
- Developed reusable prompt templates and function-calling mechanisms that abstracted common enterprise procedures, improving **code modularity** and maintainability.
- Implemented a validation pipeline using **Python scripts** to ensure schema compliance and API integrity for submitted skill definitions before integration.

AI-Assisted Development Environment for Skill Authoring

- Configured and operated **AI-assisted editors** (like Cursor) to rapidly prototype and refine **prompt engineering** strategies and tool descriptions for deterministic AI skills.
- Built a set of custom tooling in **Python** to automate the generation of **MCP schemas** based on natural language descriptions, reducing manual effort by approximately **40%**.
- Designed and executed edge-case testing scenarios for generated skills, focusing on error handling and fallback logic to ensure **production readiness**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
