PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Administered and troubleshot daily operations for the **cybersecurity data platform**, ensuring data flow integrity and system stability during a SIEM-to-IaC transition.
- Served as the primary operator for the **EU Sovereign Region**, meticulously adhering to data residency and isolation protocols for all platform deployments and incident responses.
- Defined and tracked **Service Level Indicators (SLIs)** and Objectives (SLOs) for platform health and resource utilization, proactively identifying and resolving bottlenecks.
- Automated manual operational tasks by developing and maintaining **Infrastructure-as-Code (IaC) scripts**, streamlining deployments and enabling auto-scaling for the data platform.
- Implemented technical guardrails and resource quotas to protect the platform from resource contention, ensuring predictable performance for data engineering and incident response teams.
- Participated in **blameless post-mortems** for production incidents, translating learnings into actionable code changes to address systemic issues.
- Managed **Splunk** instances for log analysis and operational monitoring, contributing to the ongoing transition towards a modern, IaC-based data infrastructure.

SKILLS

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Linux, Shell Scripting

Data Engineering & Platforms – Data Lakehouse, Data Logistics, Data Platform, IaC, CI/CD, Jenkins, Git, Kubernetes

Observability & Monitoring – Splunk, Dynatrace, P1/P2 Incident Response, SLA Management

Scripting & Automation – Python, Shell Scripting, Cron Jobs

Databases – SQL, PostgreSQL, MySQL, Oracle

Development Methodologies – Agile, Scrum, Jira, Confluence

PROJECTS

Cybersecurity Data Lakehouse Infrastructure

- Designed and deployed foundational infrastructure for a centralized **cybersecurity data lakehouse** using **AWS** services (EC2, S3, Lambda) and containerization with **Docker**.
- Implemented **IaC principles** with Jenkins pipelines for automated provisioning and configuration management of the data platform's core components.
- Developed Python scripts for data ingestion and enrichment, supporting the unification of security telemetry from disparate sources into a high-performance ecosystem.

EU Sovereign Region Data Platform Operations

- Established operational procedures and automation for a dedicated **EU Sovereign Region** data platform, ensuring strict adherence to data residency and compliance mandates.
- Integrated **Splunk** for real-time log monitoring and threat detection within the EU region, supporting incident response with timely data analysis.
- Configured and maintained Linux-based infrastructure, including shell scripting for routine system administration and log analysis tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
