PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and deployed custom AI agents on the Workday Agent Harness, integrating with enterprise data sources via Agent-Ready Tools and MCP to automate complex HR and finance workflows.
- Led technical discovery sessions with senior leaders at enterprise organizations, translating ambiguous business requirements into detailed specifications for agentic app development.
- Provided direct feedback to product and engineering teams on the Developer Agent SDK and agent frameworks, identifying recurring customer friction points that shaped the roadmap for new platform capabilities.
- Engineered Python scripts to automate data ingestion and transformation for agent training pipelines, processing approximately 5,000 records per minute to prepare data for downstream ML tasks.
- Collaborated with AI Deployment Architects and Workday Services leads to guide customer agents from initial concept through to production deployment within standard 6-month cycles.
- Containerized agent services using Docker and deployed them to a Kubernetes cluster, configuring basic resource limits and setting up CI/CD pipelines with Jenkins for automated builds and deployments.
- Developed and maintained production runbooks and internal documentation for custom agent deployments, reducing onboarding time for new clients by an estimated 30%.

SKILLS

AI/ML Platforms – Workday Agent Harness, Developer Agent SDK, Agent Frameworks, MCP

Programming Languages – Python, Java, SQL

Cloud & Containerization – AWS, Docker, Kubernetes, Jenkins

Agentic Systems & Tools – A2A, Sana, Data Cloud

Data & Scripting – pandas, NumPy, Shell Scripting

Enterprise Systems – HR Data, Finance Data

PROJECTS

Customer AI Agent Onboarding Framework

- Developed a Python-based framework to streamline the onboarding of custom AI agents for enterprise clients, reducing initial setup time by an average of 40%.
- Built reusable agent components and integration patterns for common HR and finance use cases, enabling faster deployment and iteration for customer projects.
- Created technical documentation and training materials for customer engineering teams on deploying and managing their AI agents within the Workday ecosystem.

Automated Data Pipeline for Agent Feature Engineering

- Designed and implemented a Python data pipeline on AWS Lambda to extract, transform, and load data from disparate enterprise sources for AI agent feature engineering.
- Developed SQL queries against PostgreSQL and Oracle databases to aggregate transaction and user data, ensuring data quality and consistency for agent training.
- Integrated the pipeline with Jenkins for scheduled execution and monitoring, processing over 10 TB of data weekly to support ongoing agent development.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
