PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python**-based data pipelines on **AWS Lambda** for processing and transforming large datasets, handling approximately **4,000 events per second** during peak loads.
- Developed and integrated **Large Language Models (LLMs)** using **LangGraph** and **LangChain** frameworks into an internal tooling prototype to automate code generation for repetitive configuration tasks.
- Contributed to the **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment of backend services, reducing deployment cycles by **15%**.
- Collaborated with Product Management and cross-functional teams to translate complex implementation challenges into **AI-driven solutions**, focusing on automating repetitive work and guiding configuration.
- Built and deployed **REST APIs** using **Java Spring Boot** to serve model inference results, ensuring reliable data exchange between the AI service and downstream applications.
- Supported performance and cost-efficiency improvements for deployed **AI capabilities** by optimizing inference endpoints and monitoring resource utilization on **AWS EC2** instances.
- Containerized AI services using **Docker** and managed deployments within an **AWS ECS** environment, ensuring scalable and reliable operation.

SKILLS

AI/ML Frameworks – LangGraph, LangChain, LangSmith, scikit-learn, pandas, NumPy

Programming Languages – Python, Java, SQL, TypeScript, Rust

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

Containerization & Orchestration – Docker, Kubernetes

Backend Development – Spring Boot, FastAPI, REST APIs

CI/CD & DevOps – Jenkins, Git, Agile, Scrum

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

AI-Powered Configuration Automation Tool

- Developed a **Python**-based application leveraging **LangChain** to process user-defined configuration templates and generate boilerplate code for enterprise software deployments.
- Integrated a **fine-tuned LLM** to interpret natural language requests for configuration adjustments, reducing manual effort by an estimated **40%** for common tasks.
- Designed the application's API using **FastAPI** for seamless integration with existing deployment workflows and containerized the service with **Docker** for consistent execution.

Automated Data Pipeline for ML Feature Engineering

- Engineered a scalable data pipeline using **Python** and **Pandas** on **AWS Lambda** to extract and transform relevant features from raw transaction logs, processing over **3,000 records per minute**.
- Implemented data validation checks and anomaly detection within the pipeline to ensure data quality for downstream machine learning models.
- Stored processed features in **AWS S3**, making them readily accessible for model training and evaluation by the data science team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
