PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Partnered directly with enterprise Subject Matter Experts to translate complex business logic, prose, and raw scripts into optimal, structured **AI skill definitions** for agentic workflows.
- Operated using **AI-assisted development tools** like Cursor and Claude Code to rapidly generate, refactor, and refine prompt logic and tool descriptions, reducing authoring time by **~35%**.
- Connected AI skills to backend systems by wiring up enterprise **REST APIs** and **MCP servers**, ensuring seamless agent execution across disparate services.
- Designed and implemented automated test suites to stress-test skill edge cases, API parameter bounds, and fallback logic, achieving **95% test coverage** on critical skill pathways.
- Established feedback loops using production agent trace logs to identify trajectory failures and continuously improve skill deterministic behavior, reducing critical errors by **18%**.
- Reviewed submitted skill pull requests for schema compliance and API integrity, establishing best practices and training domain experts on self-serve authoring workflows.
- Containerized Python-based skill services using **Docker** and deployed them to **AWS EKS** clusters, configuring basic resource limits for predictable rollout.

SKILLS

Languages – Python, TypeScript, SQL, Java

AI/ML Tools – Cursor, Claude Code, scikit-learn, TensorFlow (conceptual)

Backend/API – REST APIs, Spring Boot, FastAPI, JSON, YAML, MCP

Cloud/DevOps – AWS (EC2, S3, Lambda, EKS), Docker, Kubernetes, Jenkins, Git

Data/Databases – PostgreSQL, MySQL, Oracle, Data Modelling

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Enterprise Logic Codification for Agent Platform

- Partnered with domain experts to translate complex business prose and procedural documentation into structured **AI skill definitions** and **prompt templates** for an agent platform.
- Developed Python scripts to parse and validate prose-based logic against predefined schemas, catching **~70%** of structural errors before AI-assisted authoring.
- Integrated generated skill definitions with existing enterprise **REST APIs** and backend services, ensuring seamless integration into the production agent execution environment.

AI-Assisted Prompt Optimization & Testing Framework

- Engineered a framework using Python and **FastAPI** to systematically test and optimize prompt structures for AI skills, abstracting messy business procedures into modular logic.
- Implemented automated test suites that stress-tested edge cases and API parameter bounds, reducing skill regressions by **~22%** across development cycles.
- Utilized **Cursor** to rapidly refactor and refine prompt logic and tool descriptions, contributing to a **~30%** reduction in average prompt token consumption.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
