PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the **reliability and availability** of a cloud-native platform, focusing on reducing operational toil and achieving desired SLAs for customer environments.
- Developed and implemented **SLIs** to ensure SLO achievement through an extendable observability architecture, including runbook automation and new process establishment.
- Partnered with platform service teams to define and implement **SRE standards**, establishing benchmarks and automation to qualify services for production deployments.
- Engineered **Python scripts** to automate ETL processes and scheduled reporting, improving data processing efficiency for enterprise business systems.
- Implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns for enhanced system resilience.
- Containerized applications using **Docker** and deployed them to a **Kubernetes** cluster (EKS), managing Helm chart configurations and resource allocation for predictable rollouts.
- Participated in **Scrum ceremonies**, contributing to sprint planning, technical estimation, and code reviews within a two-week sprint cycle.

SKILLS

Cloud Native Technologies – Kubernetes, Istio, OPA, Prometheus, Grafana, GoLang, CloudWatch, AWS (EC2, S3, Lambda)

Programming Languages – Python, Java, Go

Scripting & Automation – Python scripting, Shell scripting

Databases – PostgreSQL, MySQL, Oracle, SQL

CI/CD & Observability – Jenkins, Git, Splunk, Dynatrace

Containerization – Docker, Kubernetes

Methodologies – Scrum, Agile

PROJECTS

Cloud Platform Observability Enhancement

- Designed and implemented an extendable **observability architecture** using **Prometheus** and **Grafana** to monitor key platform services, reducing P1 incident detection time by approximately 30%.
- Automated the generation of **runbooks** for common operational tasks in Python, decreasing manual intervention for routine maintenance by 40%.
- Developed **SLIs** for critical platform components, integrating them with **Kubernetes** event streams to provide real-time reliability metrics.

Automated Data Pipeline for Enterprise Systems

- Built a **Python ETL pipeline** to ingest and transform data from disparate enterprise business systems, consolidating it into a central PostgreSQL data warehouse.
- Developed **scheduled reporting scripts** using Python and SQL to provide operational insights to business analysts, improving data accessibility and reducing manual report generation effort by 15 hours per week.
- Integrated the pipeline with **AWS S3** for intermediate data staging and archival, ensuring data durability and efficient processing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
