

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation tasks for supply chain analytics, processing approximately **500GB** of raw data weekly.
- Developed and deployed **Java Spring Boot** REST APIs for integrating disparate supply chain systems, enabling seamless data exchange and reducing manual data entry by **30%**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to strict operational SLAs.
- Collaborated with cross-functional teams to gather requirements and translate complex supply chain challenges into actionable software development plans.
- Analyzed and modelled large-scale datasets using **SQL** (PostgreSQL) and **pandas** to identify operational inefficiencies and provide data-driven insights for process improvement.
- Built and enhanced scalable data integration pipelines using **Python** and **AWS Lambda**, processing over **10,000** supply chain events per hour.
- Containerized applications using **Docker** and managed deployments within a **Kubernetes** cluster on **AWS EKS**, improving deployment consistency and reducing setup time by **40%**.

SKILLS

Programming Languages – Python, Java, R, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Git, Jenkins, Jira, Splunk, Dynatrace

Data & Analytics – ETL, Data Pipelines, Data Modelling, Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

Supply Chain Optimization Engine

- Developed a **Python**-based engine to analyze historical demand data and optimize inventory levels, projecting a potential **15%** reduction in carrying costs.
- Integrated machine learning models using **scikit-learn** for demand forecasting, achieving an average Mean Absolute Percentage Error (MAPE) of **12%** on test data.
- Designed and implemented data processing pipelines using **pandas** and **SQL** to prepare datasets for model training and analysis, handling over **200GB** of transactional data.

Automated Reporting & Visualization Platform

- Built a **Power BI** dashboard to visualize key supply chain metrics, including lead times, inventory turnover, and on-time delivery rates, used by operations managers.
- Developed automated **Python** scripts to extract, transform, and load data from various sources into a centralized data warehouse for reporting.
- Implemented **DAX** measures and complex data models within Power BI to provide actionable insights and support strategic decision-making for a **5-person** operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
