PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed incident response and SLA adherence for enterprise applications, resolving an average of 5 P1/P2 incidents per week within defined response times using **Splunk** and **Dynatrace**.
- Developed and maintained **Python** scripts to automate data ingestion and ETL processes, reducing manual data preparation time by approximately **30%** for weekly operational reports.
- Designed and implemented **Java Spring Boot** REST APIs to support cross-system integrations, handling approximately **1,500** requests per hour.
- Contributed to the refinement of **JPA** entities and database interactions within a Spring Boot application, ensuring data integrity across **PostgreSQL** and **MySQL** schemas.
- Containerised multiple backend services using **Docker**, facilitating consistent deployment across development and production environments on **AWS EC2**.
- Collaborated with cross-functional teams to gather requirements for operational dashboards and participated in Agile ceremonies, including sprint planning and retrospectives.
- Enhanced the observability of critical systems by configuring alerts and dashboards in **CloudWatch** and **Splunk**, enabling proactive identification of potential issues.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, JPA, Hibernate, Microservices.

Data Engineering & Scripting – Python, Pandas, NumPy, ETL, SQL, PostgreSQL, MySQL, Oracle.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux.

Observability & Monitoring – Splunk, Dynatrace.

Project Management & Agile – Jira, Confluence, Scrum.

Data Analytics & BI – Power BI, Tableau, DAX, R, Scikit-learn.

PROJECTS

Enterprise Application Support Dashboard (HCL Technologies)

- Developed a **Java Spring Boot** application to aggregate logs and metrics from multiple enterprise systems, providing a centralized view for production support teams.
- Implemented real-time alerting mechanisms using **Splunk** queries that triggered notifications for critical errors or performance degradation, reducing manual monitoring effort by **40%**.
- Designed and built RESTful endpoints to expose key operational metrics, enabling integration with existing incident management workflows.

Automated Data Reconciliation Service (HCL Technologies)

- Engineered a **Python**-based service to automate the reconciliation of transaction data between two disparate financial systems, handling approximately **50,000** records daily.
- Developed SQL scripts for data validation and discrepancy identification, ensuring data consistency and accuracy across integrated platforms.
- Containerised the service with **Docker** and deployed it on **AWS Lambda**, creating a scalable and efficient batch processing solution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
