

# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Developed **predictive models** using **R** and **Python** to achieve a **25%** increase in forecast accuracy, as measured by **mean absolute error**, by implementing **regression analysis** and **time-series forecasting** techniques.
- Designed and implemented **data visualizations** using **Power BI** and **Tableau** to improve business insights, as measured by **user adoption rates**, by creating **interactive dashboards** and **data stories** that facilitated data-driven decision-making.
- Improved **data quality** by **15%** through **data validation** and **data cleansing** using **SQL** and **Python**, as measured by **data consistency metrics**, by developing and implementing **data governance policies** and **data standardization procedures**.
- Enhanced **machine learning** models using **scikit-learn** and **pandas** to achieve a **30%** increase in model accuracy, as measured by **precision and recall metrics**, by applying **feature engineering techniques** and **hyperparameter tuning** methods.
- Created **data pipelines** using **Apache Spark** and **AWS** to process large datasets, as measured by **data processing speeds**, by designing and implementing **scalable data architectures** and **real-time data processing systems**.
- Collaborated with cross-functional teams to develop and deploy **data-driven solutions** using **Agile methodologies** and **Scrum frameworks**, as measured by **project delivery timelines**, by facilitating **stakeholder communication** and **requirements gathering** activities.

## SKILLS

**Data Science** – R, Python, SQL, machine learning, predictive modeling, data visualization.

**Data Engineering** – Apache Spark, AWS, data pipelines, data warehousing, ETL.

**Business Intelligence** – Power BI, Tableau, data visualization, data storytelling, business analytics.

**Machine Learning** – scikit-learn, pandas, NumPy, supervised and unsupervised learning, deep learning.

**Statistics** – regression analysis, time-series forecasting, hypothesis testing, statistical modeling.

**Cloud Computing** – AWS, cloud architecture, cloud security, cloud migration, cloud management.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

**Predictive Analytics Platform for Healthcare (HCL Technologies)**

- Developed a **predictive model** using **R** and **Python** to forecast patient outcomes, as measured by **mean absolute error**, by implementing **regression analysis** and **time-series forecasting** techniques, resulting in a

**20%** increase in forecast accuracy.

- Designed and implemented **data visualizations** using **Power BI** and **Tableau** to improve business insights, as measured by **user adoption rates**, by creating **interactive dashboards** and **data stories** that facilitated data-driven decision-making, resulting in a **15%** increase in user engagement.
- Improved **data quality** by **10%** through **data validation** and **data cleansing** using **SQL** and **Python**, as measured by **data consistency metrics**, by developing and implementing **data governance policies** and **data standardization procedures**, resulting in a **5%** reduction in data errors.

#### **Data-Driven Insights for Financial Services (Personal Project)**

- Created a **data pipeline** using **Apache Spark** and **AWS** to process large financial datasets, as measured by **data processing speeds**, by designing and implementing **scalable data architectures** and **real-time data processing systems**, resulting in a **25%** increase in data processing efficiency.
- Developed a **machine learning model** using **scikit-learn** and **pandas** to predict stock prices, as measured by **precision and recall metrics**, by applying **feature engineering techniques** and **hyperparameter tuning** methods, resulting in a **15%** increase in model accuracy.
- Designed and implemented **data visualizations** using **Power BI** and **Tableau** to improve business insights, as measured by **user adoption rates**, by creating **interactive dashboards** and **data stories** that facilitated data-driven decision-making, resulting in a **10%** increase in user engagement.

### **ACHIEVEMENTS & CERTIFICATIONS**

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
