HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Built and maintained **responsive React and Angular web applications**, implementing reusable component libraries and state management patterns that improved development consistency and reduced UI build time by **25%**.
- Developed **TypeScript and JavaScript (ES6+)** frontend features integrating with Java Spring Boot REST APIs, ensuring reliable data flows and clean separation of concerns across full-stack application layers.
- Implemented **JWT-based authentication flows and role-based UI rendering** in Angular and React, ensuring secure and auditable access patterns across customer-facing interfaces.
- Collaborated with UX designers and product owners to translate wireframes into **pixel-accurate, accessible HTML5/CSS3 components**, ensuring cross-browser compatibility and WCAG compliance.
- Wrote **unit and component tests using Jest and React Testing Library**, achieving 80%+ frontend code coverage and catching UI regressions before production releases.
- Worked with backend engineers in an **Agile/Scrum** environment to define API contracts, consume REST endpoints, and deliver end-to-end features across two-week sprint cycles.
- Optimised **frontend bundle size and page load performance** using code splitting, lazy loading, and caching strategies, improving Time-to-Interactive metrics by 30% for high-traffic pages.
- Maintained **CI/CD pipelines for frontend build and deployment** using Jenkins and Git, enabling automated testing and staging deployments with consistent, reproducible builds.

SKILLS

Frontend Frameworks – React, Angular, Vue.js; component architecture, hooks, state management (Redux, NgRx).

Languages – TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS.

Testing – Jest, React Testing Library, Cypress; TDD, component and E2E testing.

Backend Integration – REST APIs, Java Spring Boot, JSON, OAuth2/JWT authentication.

Cloud & DevOps – AWS (S3, CloudFront), Docker, Jenkins, CI/CD pipelines, Git.

Databases – PostgreSQL, MongoDB; supporting backend data requirements for frontend features.

Development Practices – Agile/Scrum, accessibility (WCAG), performance optimisation, code reviews.

PROJECTS

Customer Portal – React Frontend (HCL Technologies)

- Built a React-based customer portal with TypeScript supporting profile management, transaction history, and real-time notifications, consuming Java Spring Boot REST APIs for 10,000+ users.
- Implemented JWT authentication and role-based UI rendering, ensuring secure access across all portal modules and aligning with backend security policies.
- Developed reusable component library and applied Redux state management patterns, reducing duplicate code by 30% and accelerating feature delivery across the application.

Internal Admin Dashboard – Angular (HCL Technologies)

- Built a responsive Angular admin dashboard providing real-time data views via REST API integration, reducing operational reporting time by 40% for internal teams.
- Configured frontend CI/CD pipeline with Jenkins for automated build, lint, test, and deployment to staging, ensuring reliable and reproducible releases.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
