PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, created, executed, and maintained **structured test cases** covering functional, regression, integration, and smoke testing for enterprise Java and Python applications in Agile sprint cycles.
- Contributed to the development of **test plans, test scripts, and test management documentation** using Jira and Confluence, ensuring full traceability from requirements to test execution.
- Performed **pre-release smoke testing and health-validation checks** across development, staging, and production environments, catching critical defects before deployment sign-off.
- Logged, tracked, and supported the resolution of defects using **Jira**, collaborating with development teams to reproduce issues, validate fixes, and confirm closure.
- Executed **User Acceptance Testing (UAT) activities** in coordination with business stakeholders, translating acceptance criteria into structured test scenarios and sign-off documentation.
- Developed **Python and SQL-based automated test scripts** for regression and data validation testing, reducing manual test execution effort by 40% across release cycles.
- Worked with **PostgreSQL, MySQL, and Oracle databases** to perform data validation testing, executing backend queries to verify data integrity across application workflows.
- Collaborated with development, infrastructure, and business teams in an **Agile/Scrum** environment, participating in sprint planning, retrospectives, and defect triage sessions.

SKILLS

Testing Types – Functional, regression, integration, smoke, UAT; manual and automated testing.

Test Management – Jira, Confluence, Zephyr; test planning, execution tracking, defect lifecycle.

Test Automation – Python (pytest, unittest), SQL-based data validation, API testing with Postman.

Databases – PostgreSQL, MySQL, Oracle; data validation queries, backend test verification.

Development Practices – Agile/Scrum, test case design, defect reporting, requirements traceability.

API Testing – REST API validation with Postman and Python requests; response schema verification.

Tools & Environment – Git, Jenkins CI/CD, Docker (test environments), AWS basics.

PROJECTS

Pre-Release Test Automation Framework (HCL Technologies)

- Designed and implemented a Python-based automated regression test suite covering 200+ test cases for enterprise Java applications, reducing manual regression effort by 40% per release cycle.
- Integrated test execution into Jenkins CI/CD pipelines, enabling automated test runs on every build and providing immediate feedback to development teams on regression failures.
- Maintained Jira-based defect tracking and test execution dashboards, improving defect resolution turnaround by 30% through clear reporting and traceability.

Defect Analysis & Data Validation Testing (HCL Technologies)

- Performed systematic data validation testing using SQL queries against PostgreSQL and Oracle databases, verifying data integrity across 10+ application workflows and reporting pipelines.
- Executed UAT sessions with business stakeholders, translating acceptance criteria into 150+ test scenarios and managing sign-off documentation for 3 major product releases.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
