HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and monitored production infrastructure on **AWS (EC2, S3, CloudWatch, Lambda, RDS)**, ensuring 99.9%+ service availability and proactive SLA compliance through alert-driven incident response.
- Developed **Python and Shell automation scripts** for operational tasks including health checks, log aggregation, auto-recovery, and deployment validation, reducing manual effort by **60%**.
- Supported **CI/CD pipeline operations using Jenkins and Git**, contributing to automated build, test, and deployment workflows that reduced release lead time by 30%.
- Monitored distributed systems using **Splunk, Dynatrace, and CloudWatch**; built observability dashboards tracking error rates, latency, and throughput to detect degradation before SLA breach.
- Participated in **on-call incident response**, performing structured triage, root cause analysis (RCA), and post-incident reviews to reduce recurring P1/P2 incident frequency by 45%.
- Applied **containerisation with Docker** and contributed to Kubernetes-based service deployments, ensuring consistent application behaviour across dev, staging, and production environments.
- Worked with development and QA teams in **Agile/Scrum** ceremonies to implement reliability improvements, define SLI/SLO targets, and drive platform stability initiatives.
- Maintained infrastructure runbooks and incident playbooks in **Confluence**, improving team onboarding and reducing time-to-resolve for known failure patterns by 35%.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, RDS, CloudWatch, IAM, VPC), Docker, Kubernetes basics.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, Grafana, Prometheus basics, PagerDuty.

Scripting & Automation – Python, Bash/Shell scripting, cron jobs, automated health checks and recovery.

CI/CD & DevOps – Jenkins, Git, automated pipelines, build/test/deploy workflows.

Databases – PostgreSQL, MySQL, Oracle; operational queries, schema migrations, performance tuning.

SRE Practices – SLI/SLO/SLA management, incident response, RCA, runbook authoring, on-call.

Development – Java Spring Boot, REST APIs, application debugging, log analysis.

PROJECTS

Production Reliability & Incident Automation (HCL Technologies)

- Designed Python-based automated health-check and self-healing scripts reducing manual incident intervention by 60%, maintaining 99.5% SLA compliance across 15+ enterprise services.
- Built a Splunk alerting framework with custom dashboards tracking error rates, queue depths, and service latency, enabling proactive degradation detection before user impact.
- Participated in on-call rotation and war-room incident coordination, contributing structured RCA documentation that reduced repeat incident occurrence by 45%.

AWS Infrastructure Monitoring & Reliability (HCL Technologies)

- Configured CloudWatch alarms and dashboards across EC2, RDS, and application tiers for proactive detection of resource contention and service degradation.
- Automated deployment validation checks using Python and Jenkins post-deploy hooks, catching 80% of configuration-related production issues before user impact.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
