# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and maintained **interactive dashboards and reports** using SQL, Python, and Power BI, enabling business stakeholders to track KPIs and make data-driven decisions in real time.
- Performed end-to-end data analysis including data extraction, cleaning, statistical analysis, and visualisation using **Python (pandas, matplotlib, seaborn)**, reducing reporting cycle time by **30%**.
- Developed and optimised complex **SQL queries and stored procedures** in PostgreSQL and MySQL to support analytical reporting workloads, improving query execution speed by 40%.
- Built **automated data validation and reconciliation scripts** in Python, replacing manual weekly QA processes and reducing data quality incidents by 35%.
- Collaborated closely with business stakeholders and engineering teams in an **Agile/Scrum** environment to define metrics, validate data sources, and deliver analytical solutions.
- Worked with **PostgreSQL and MongoDB** to design efficient data models supporting high-volume analytical queries, applying indexing and partitioning strategies.
- Maintained **backend services in Java and Spring Boot** that powered data ingestion and transformation pipelines, enabling cleaner and more reliable data for downstream analysis.
- Documented analytical methodologies and KPI definitions, establishing a **governed data layer** enabling controlled self-service analytics across business functions.

## SKILLS

**Analytics & Visualisation** – Python (pandas, NumPy, matplotlib, seaborn), Power BI, Tableau, Advanced Excel.

**SQL & Databases** – PostgreSQL, MySQL, MongoDB; complex queries, stored procedures, indexing, and performance tuning.

**Programming Languages** – Python, SQL, Java, Bash scripting.

**Data Engineering** – ETL pipelines, data cleaning, transformation, and validation frameworks.

**Backend** – Java Spring Boot, REST APIs, data ingestion services.

**Cloud & Tools** – AWS (S3, Redshift), Docker, Jenkins, Git, Jira.

**Development Practices** – Agile/Scrum, data governance, documentation, statistical analysis.

## PROJECTS

**Business Performance Dashboard (HCL Technologies)**

- Designed and built an interactive Power BI dashboard consolidating data from multiple SQL sources, enabling stakeholders to monitor KPIs in real time and reduce report generation time by 30%.
- Automated data extraction and transformation using Python and SQL stored procedures, eliminating 10+ hours of manual weekly reporting and improving data accuracy.

**Customer Data Quality & Reporting Pipeline (HCL Technologies)**

- Performed exploratory data analysis and statistical profiling on customer transaction datasets (1M+ records) using Python and SQL to identify data quality issues and surface actionable insights.
- Built reusable data validation and cleaning scripts, reducing downstream analysis errors by 25% and improving report reliability consumed by senior leadership.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
