PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **production support and monitoring** for enterprise Java/.NET applications using **Splunk, CloudWatch, and Dynatrace**, identifying and triaging **P1/P2 incidents** with clear documentation and SLA adherence, directly supporting reliability and quality outcomes.
- Validated functionality and data integrity across multiple systems through **SQL query execution** (PostgreSQL, MySQL, Oracle) and **ad-hoc testing**, identifying schema inconsistencies and supporting bug triage discussions with developers.
- Developed and maintained **Python automation scripts** for data pipelines and ETL workflows, reducing manual testing overhead and improving test coverage for scheduled reporting systems.
- Collaborated with cross-functional teams including developers and product managers to document defects, manage issue tracking in **Jira**, and participate in **Agile ceremonies**, ensuring clear communication of quality findings.
- Supported **continuous integration and deployment** through **Jenkins pipeline monitoring, Git workflows**, and code reviews, ensuring quality gates were met before feature releases reached production.
- Leveraged **browser developer tools** and **AWS environment monitoring** (EC2, S3, CloudWatch) to inspect elements, validate API responses, and troubleshoot application behaviour across different deployment environments.

SKILLS

Test Management & QA – manual testing, smoke testing, regression testing, bug reporting and triage, test documentation, Jira, defect tracking.

Testing Tools & Platforms – Splunk, Dynatrace, CloudWatch, browser developer tools, Linux shell scripting for log analysis.

Programming & Scripting – Python, Java, SQL, shell scripting, REST API validation.

Databases – PostgreSQL, MySQL, Oracle, SQL query execution, data validation.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Technical Concepts – JSON structures, API testing, application monitoring, cross-environment validation.

Soft Skills – clear communication, attention to detail, cross-functional collaboration, documentation standards.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Monitoring & Incident Response (HCL Technologies)

- Performed daily **smoke and regression testing** of Java Spring Boot microservices deployed on **AWS**, validating feature deployments and identifying **P1/P2 defects** prior to production impact.
- Used **Splunk and Dynatrace** to monitor application health, analyze logs, and correlate incidents with code changes, generating clear, actionable bug reports for development teams.
- Collaborated in **bug triage meetings** with developers and product managers to prioritize issues, validate root causes, and track remediation progress in **Jira**.

Data Pipeline Testing & Validation (HCL Technologies)

- Designed and executed **SQL-based test cases** to validate data accuracy across PostgreSQL and Oracle databases, identifying schema inconsistencies and data integrity issues before pipeline deployment.
- Automated repetitive validation workflows using **Python scripts**, reducing manual testing time by approximately **30%** and improving consistency of test results.
- Documented test cases and validation procedures in **Confluence**, establishing standards for future data pipeline testing and supporting knowledge transfer across the QA team.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
