+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support and monitoring** for enterprise applications across Java/.NET stacks using **Splunk, CloudWatch, and Dynatrace**, managing SLA compliance and resolving **P1/P2 incidents** with rapid root-cause analysis and mitigation strategies
- Designed and implemented **Python-based data pipelines and ETL workflows** for automated reporting and system health analytics, demonstrating strong **data engineering** and scripting capabilities applicable to hydraulic data processing and model validation
- Performed complex **SQL query optimization and data validation** across **PostgreSQL, MySQL, and Oracle** databases, supporting ad-hoc analysis and schema management—directly transferable to network survey data integration and model database administration
- Developed and maintained **REST APIs and microservices** using **Java Spring Boot**, with hands-on experience in **CI/CD pipeline orchestration via Jenkins, Git version control**, and Agile delivery—ensuring robustly defined technical solutions and team collaboration
- Built and deployed containerized applications using **Docker** and **AWS infrastructure (EC2, S3, Lambda, CloudWatch)**, coupled with **Linux system administration** and shell scripting for operational reliability—supporting infrastructure-as-code principles for modelling environments
- Completed **MSc in Data Analytics** with advanced training in statistical analysis, data visualization, and computational problem-solving; proven ability to interpret complex technical specifications, deliver reports, and mentor junior team members in rigorous analytical methodologies

SKILLS

Data & Hydraulic Modelling – Python, SQL, data pipeline development, data validation, ETL processes, analytical reporting.

Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, shell scripting.

Software Development – Java, Spring Boot, REST APIs, microservices architecture.

Monitoring & Reliability Engineering – Splunk, Dynatrace, CloudWatch, SLA management, incident response, production support.

Project & Team Collaboration – Jira, Confluence, Agile/Scrum, client engagement, technical documentation, mentoring.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Data Engineering (HCL Technologies)

- Led **production monitoring and incident management** for mission-critical Java/.NET applications serving enterprise clients, utilizing **Splunk and Dynatrace** for real-time visibility and achieving **95%+ SLA adherence** through proactive alerting and rapid P1/P2 remediation
- Architected **Python ETL pipelines** to automate data extraction from multiple sources, transform operational metrics, and load into reporting systems—reducing manual analysis time by **40%** and enabling data-driven decision-making across infrastructure teams
- Performed **SQL database optimization** across heterogeneous environments (PostgreSQL, MySQL, Oracle), executing schema migrations and validation queries to support evolving application requirements and ensure data integrity for downstream analytics

Microservices & Infrastructure Modernization (HCL Technologies)

- Developed **Java Spring Boot microservices** and **REST APIs** for legacy system decomposition, implementing feature enhancements and bug fixes while maintaining backward compatibility and service reliability
- Designed and maintained **CI/CD pipelines using Jenkins**, implementing automated build, test, and deployment stages with **Git branching strategies** and rigorous code review practices to ensure code quality and rapid feature delivery
- Provisioned and managed **AWS cloud infrastructure (EC2, S3, Lambda)** with **Docker containerization**, establishing operational runbooks, monitoring dashboards, and **Linux-based automation scripts** for seamless deployment and system health management

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
